MA-SqueezeliteBrowse: menu walkthrough

Screens of the piCorePlayer (JiveLite, 1920x1080) browsing Music Assistant 2.10.5 with the patched Squeezelite provider.

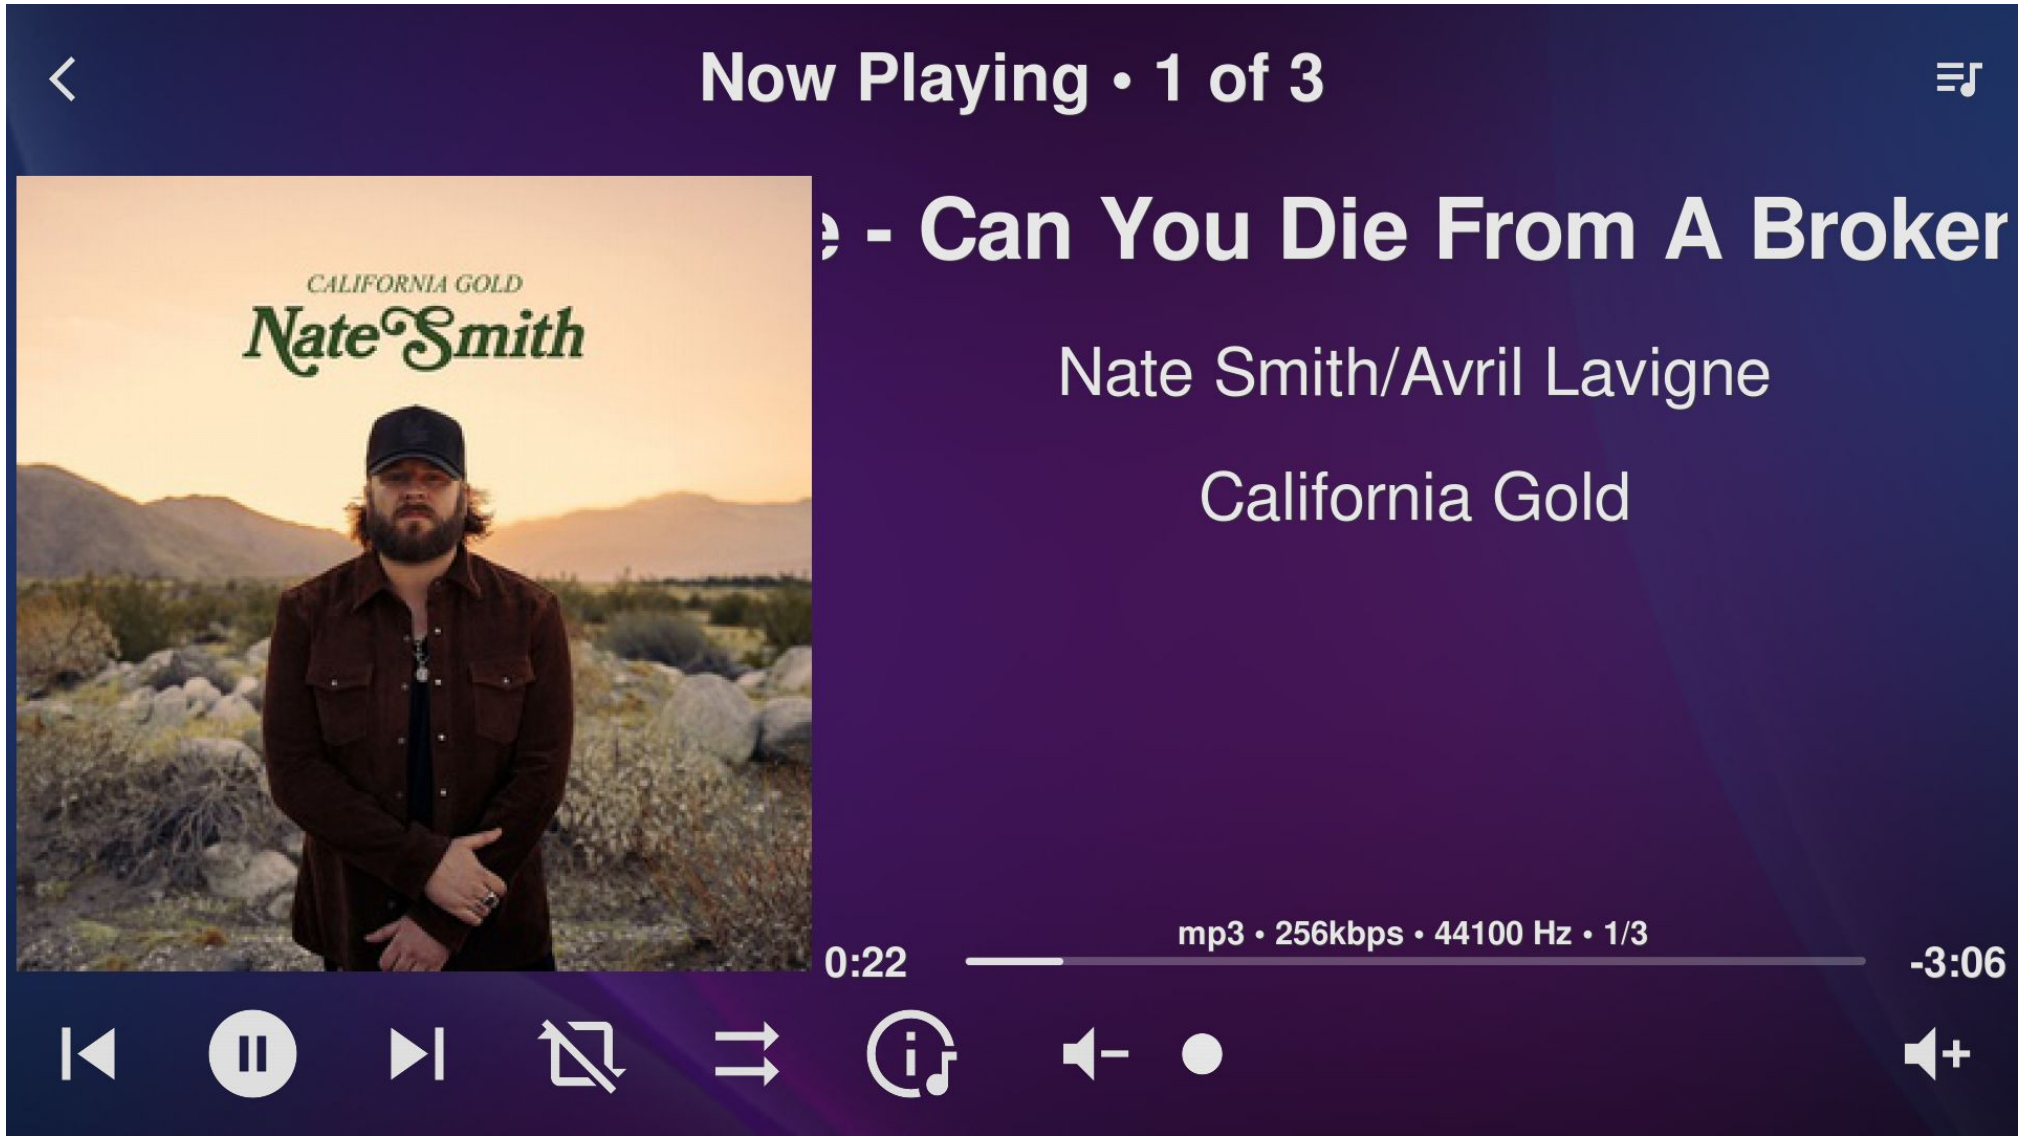

Captured 2026-10-11. The content shown is a moment in time: it follows the library, the presets and the Home Assistant labels.

Main Menu

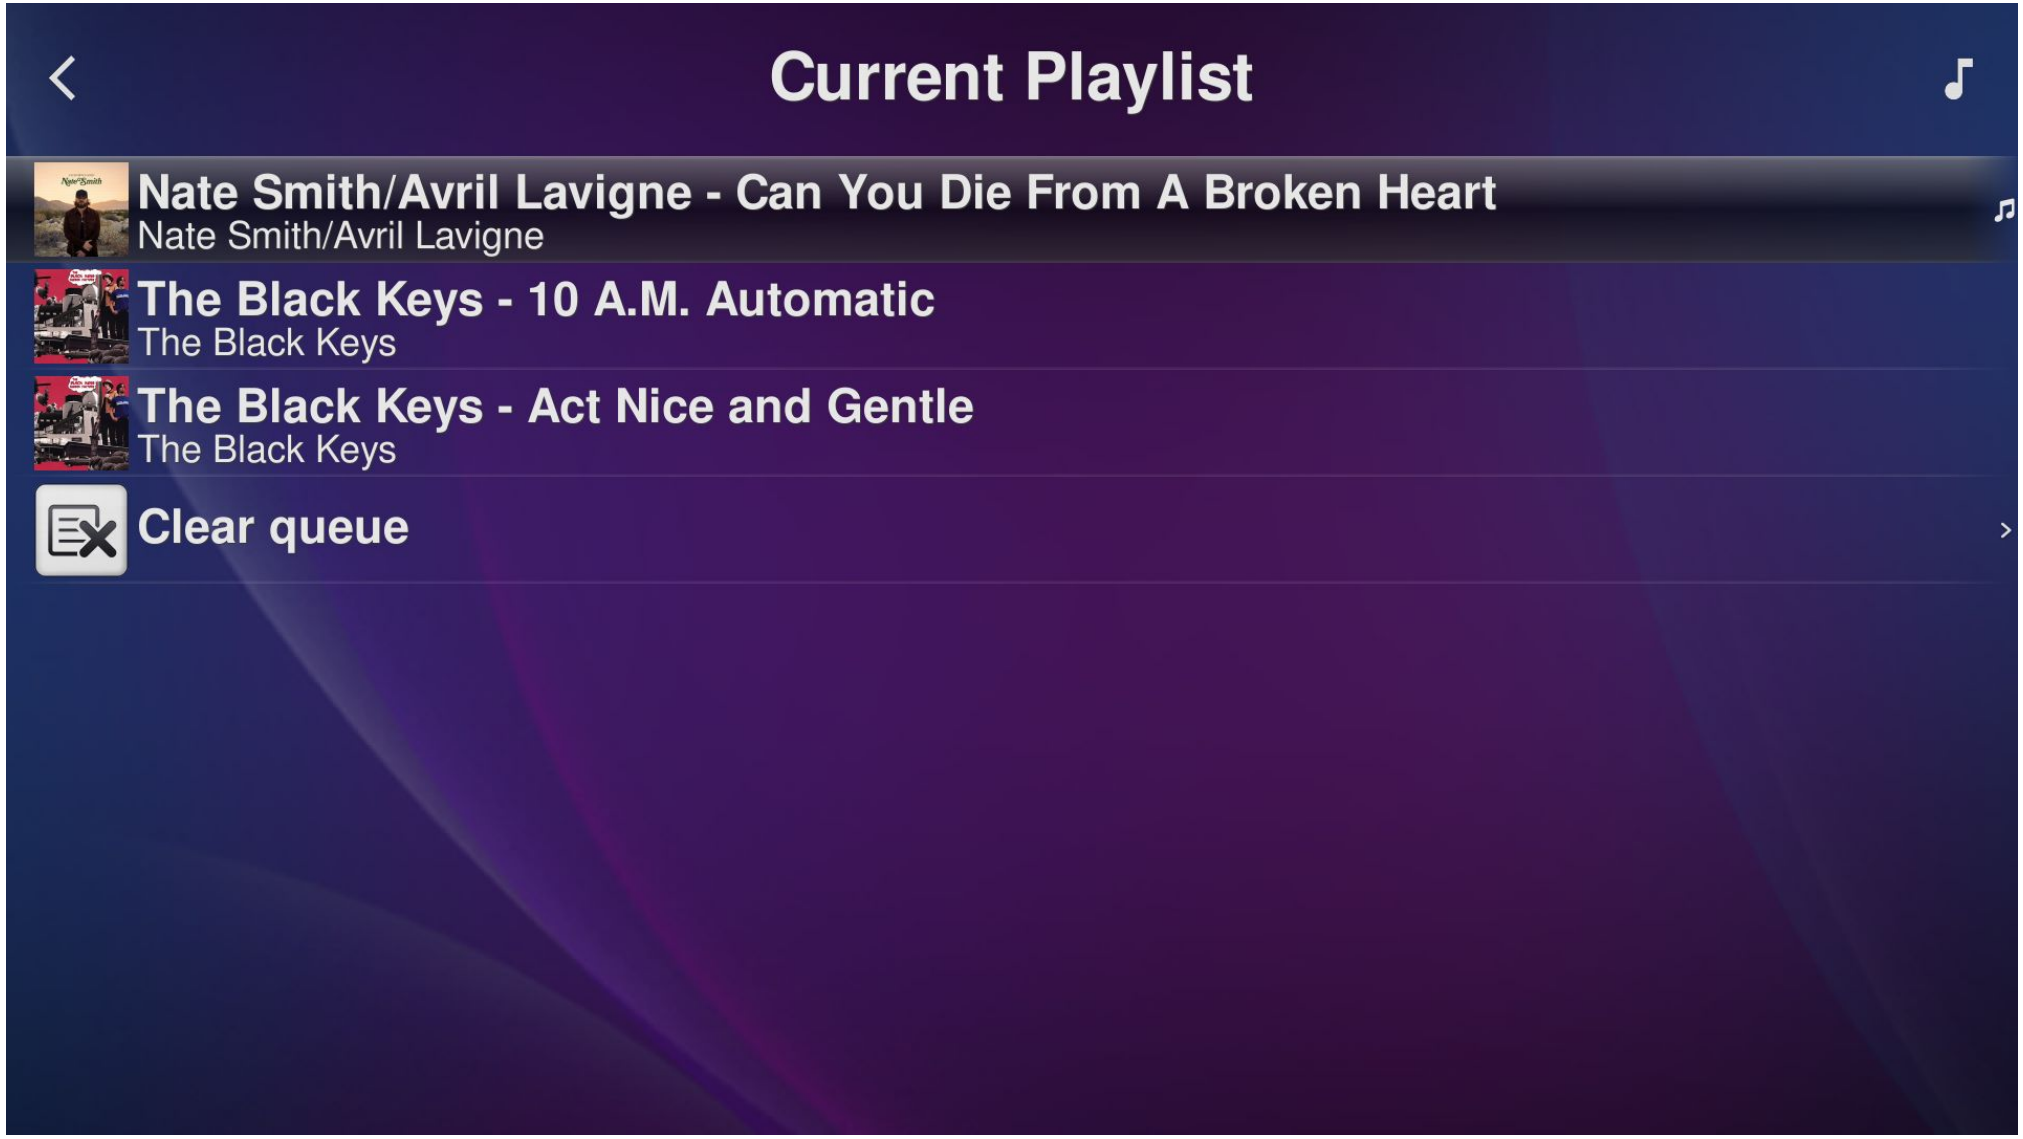

Home screen of the piCorePlayer (JiveLite). Settings holds the HA Extras entry when it is enabled for the device.

Now Playing

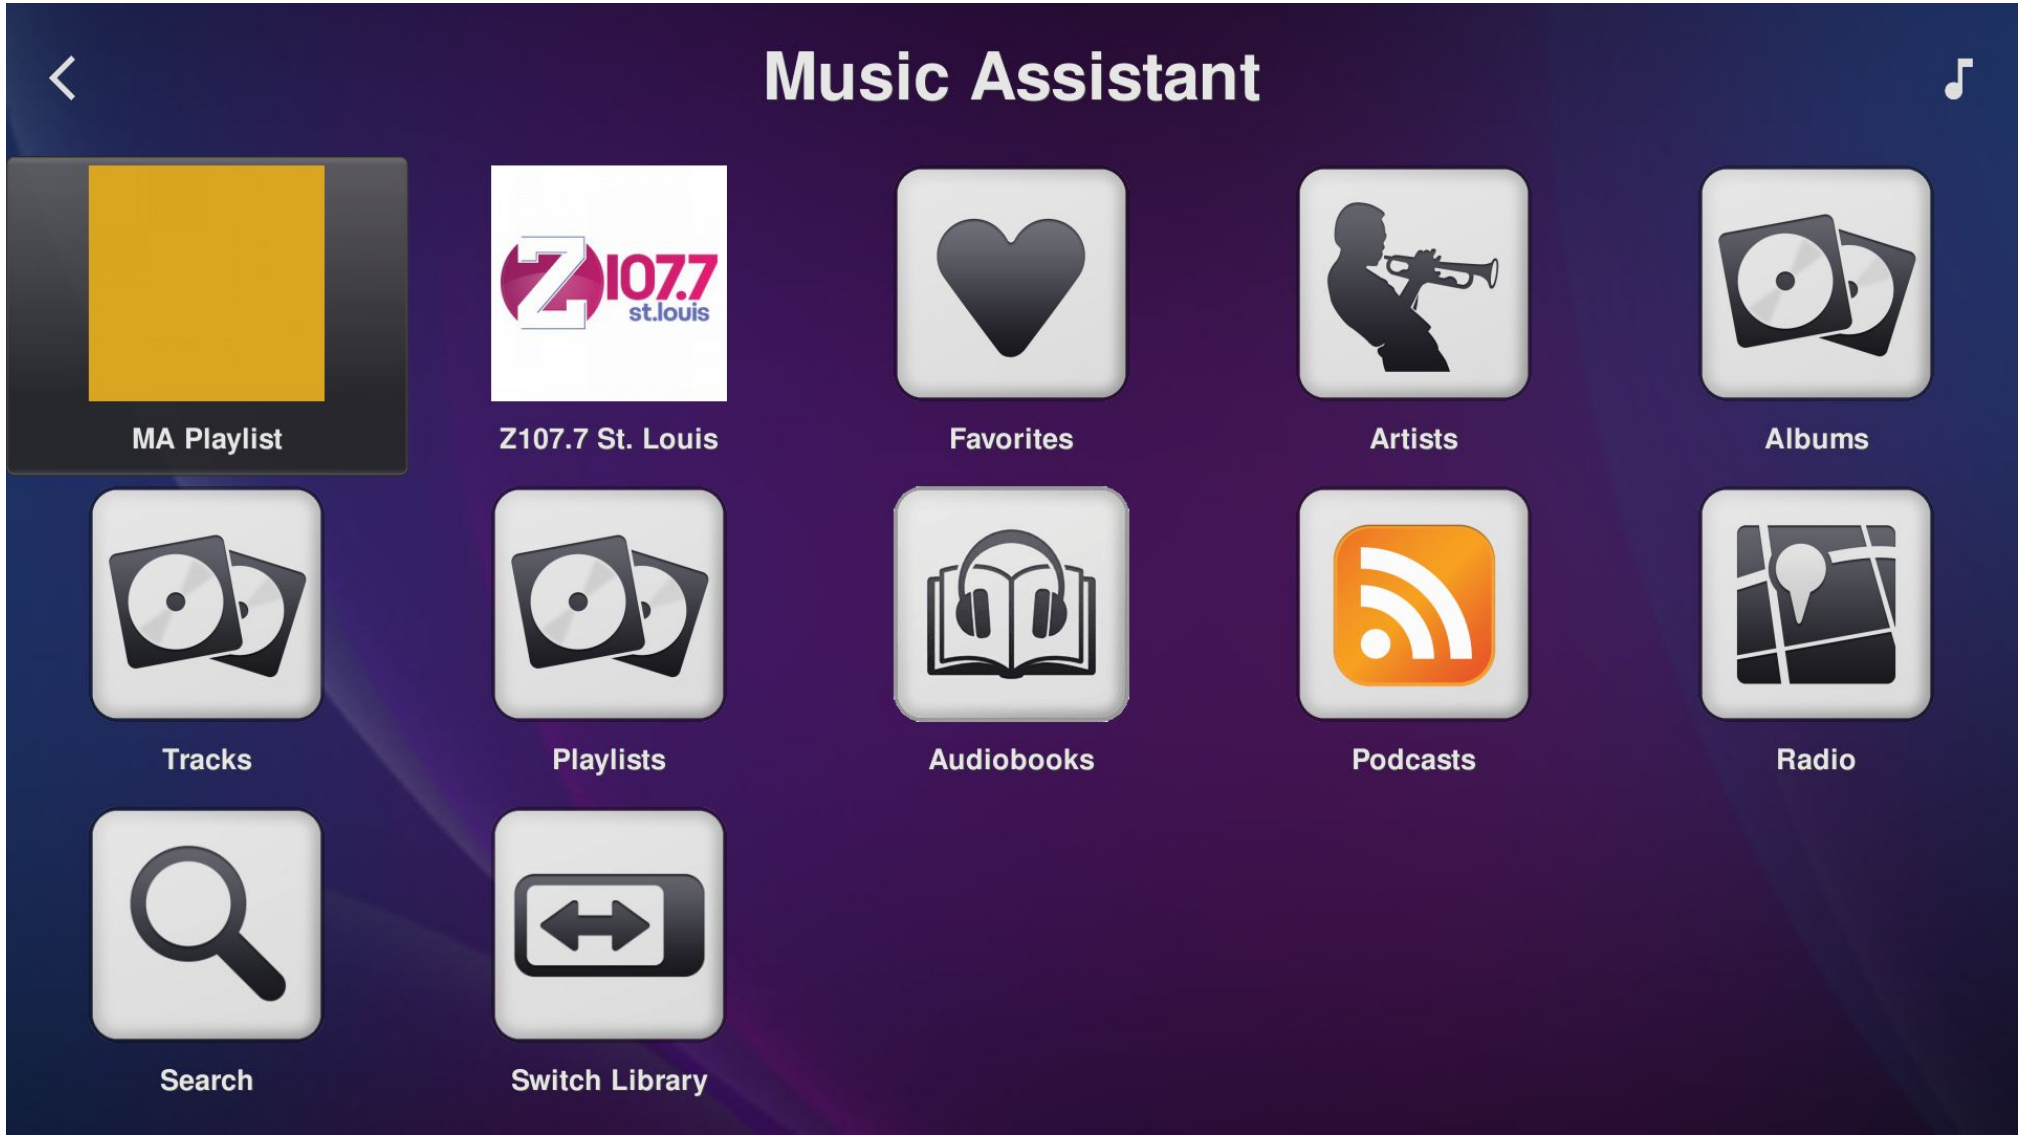

Reached with the Now Playing tile or the [key. Shows the current track from the Music Assistant queue.

Queue (Current Playlist)

The player's queue as Music Assistant has it. Long press a row for Play Now, Play Next, Move to End and Delete item.

My Music

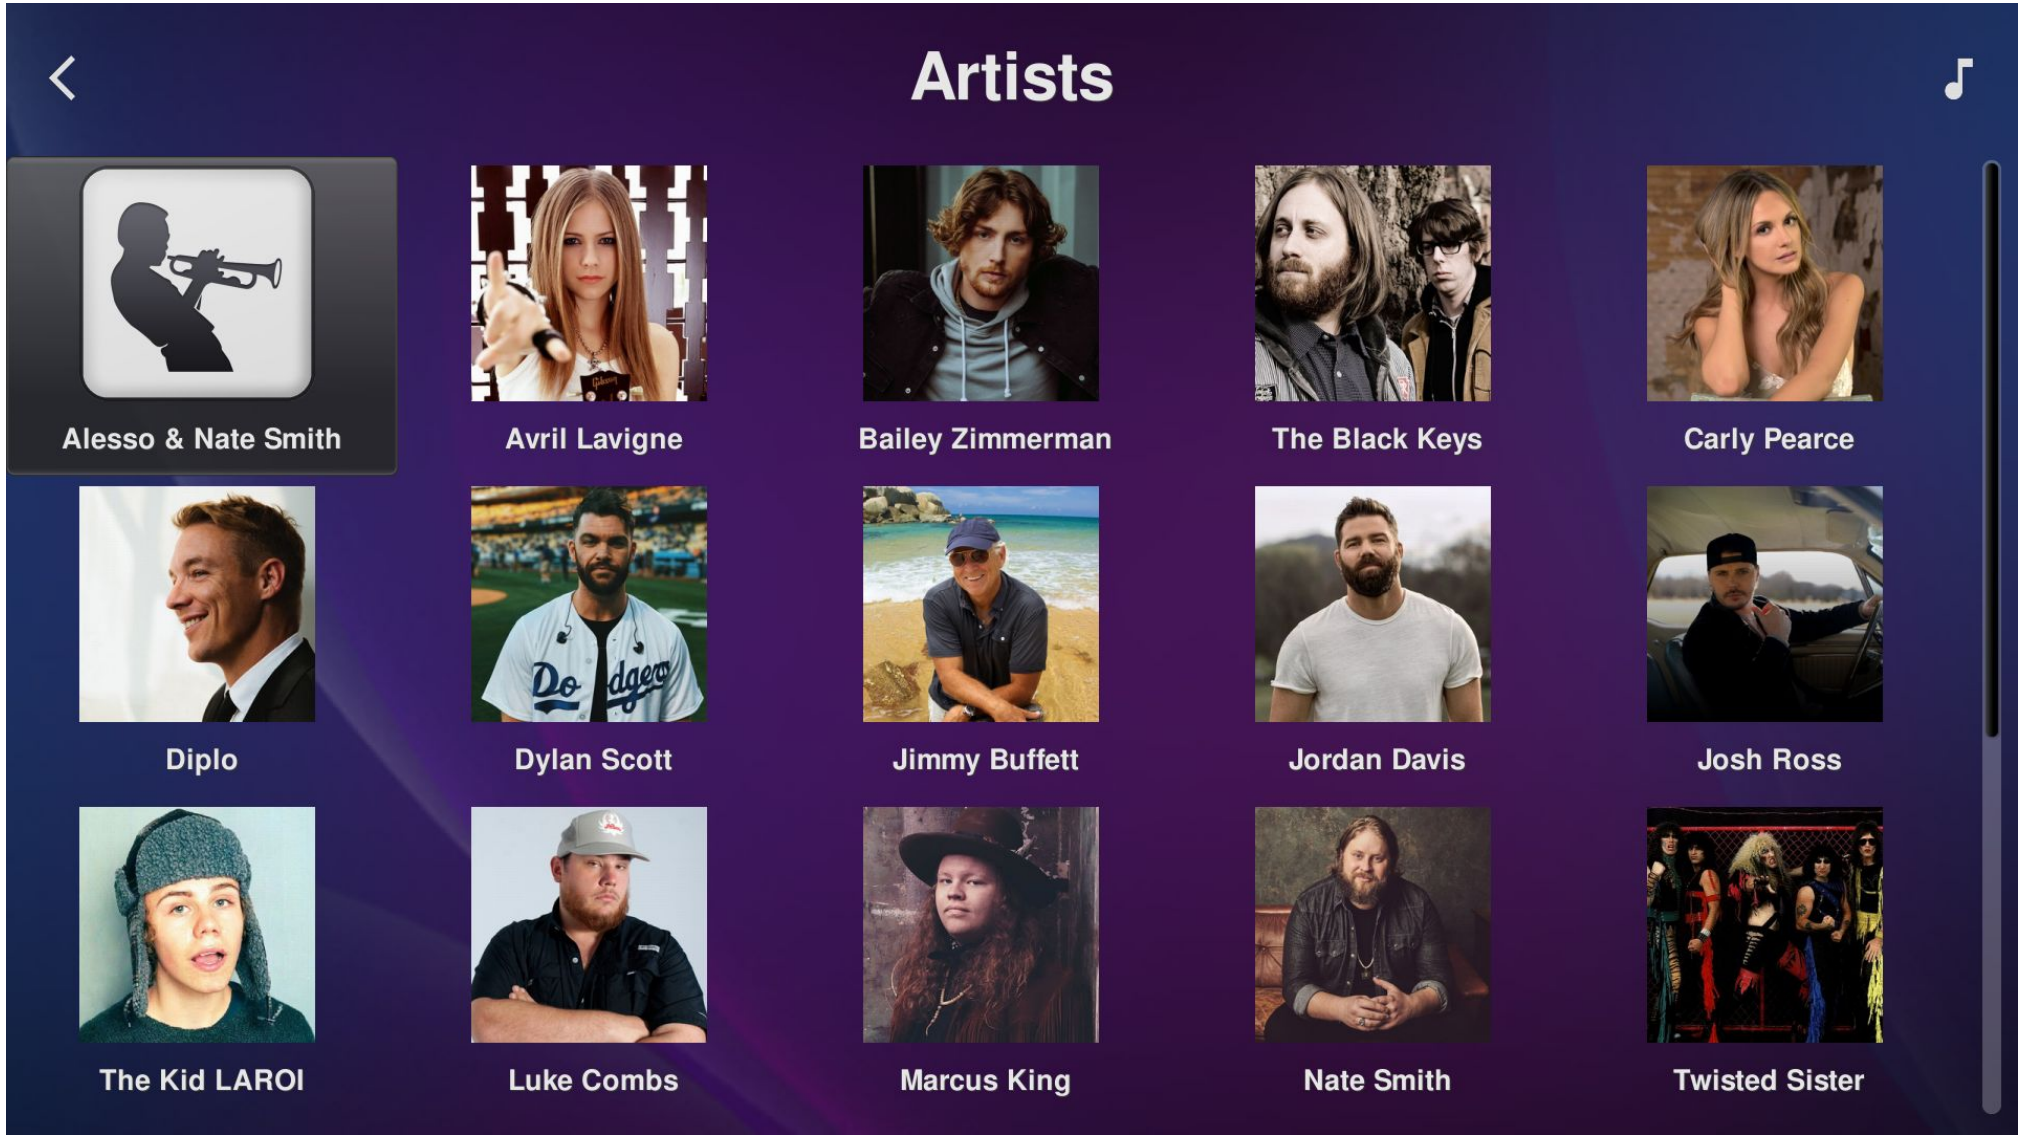

The two preset tiles come from the player's settings in Music Assistant (favorited playlists and radio stations).

My Music - Favorites

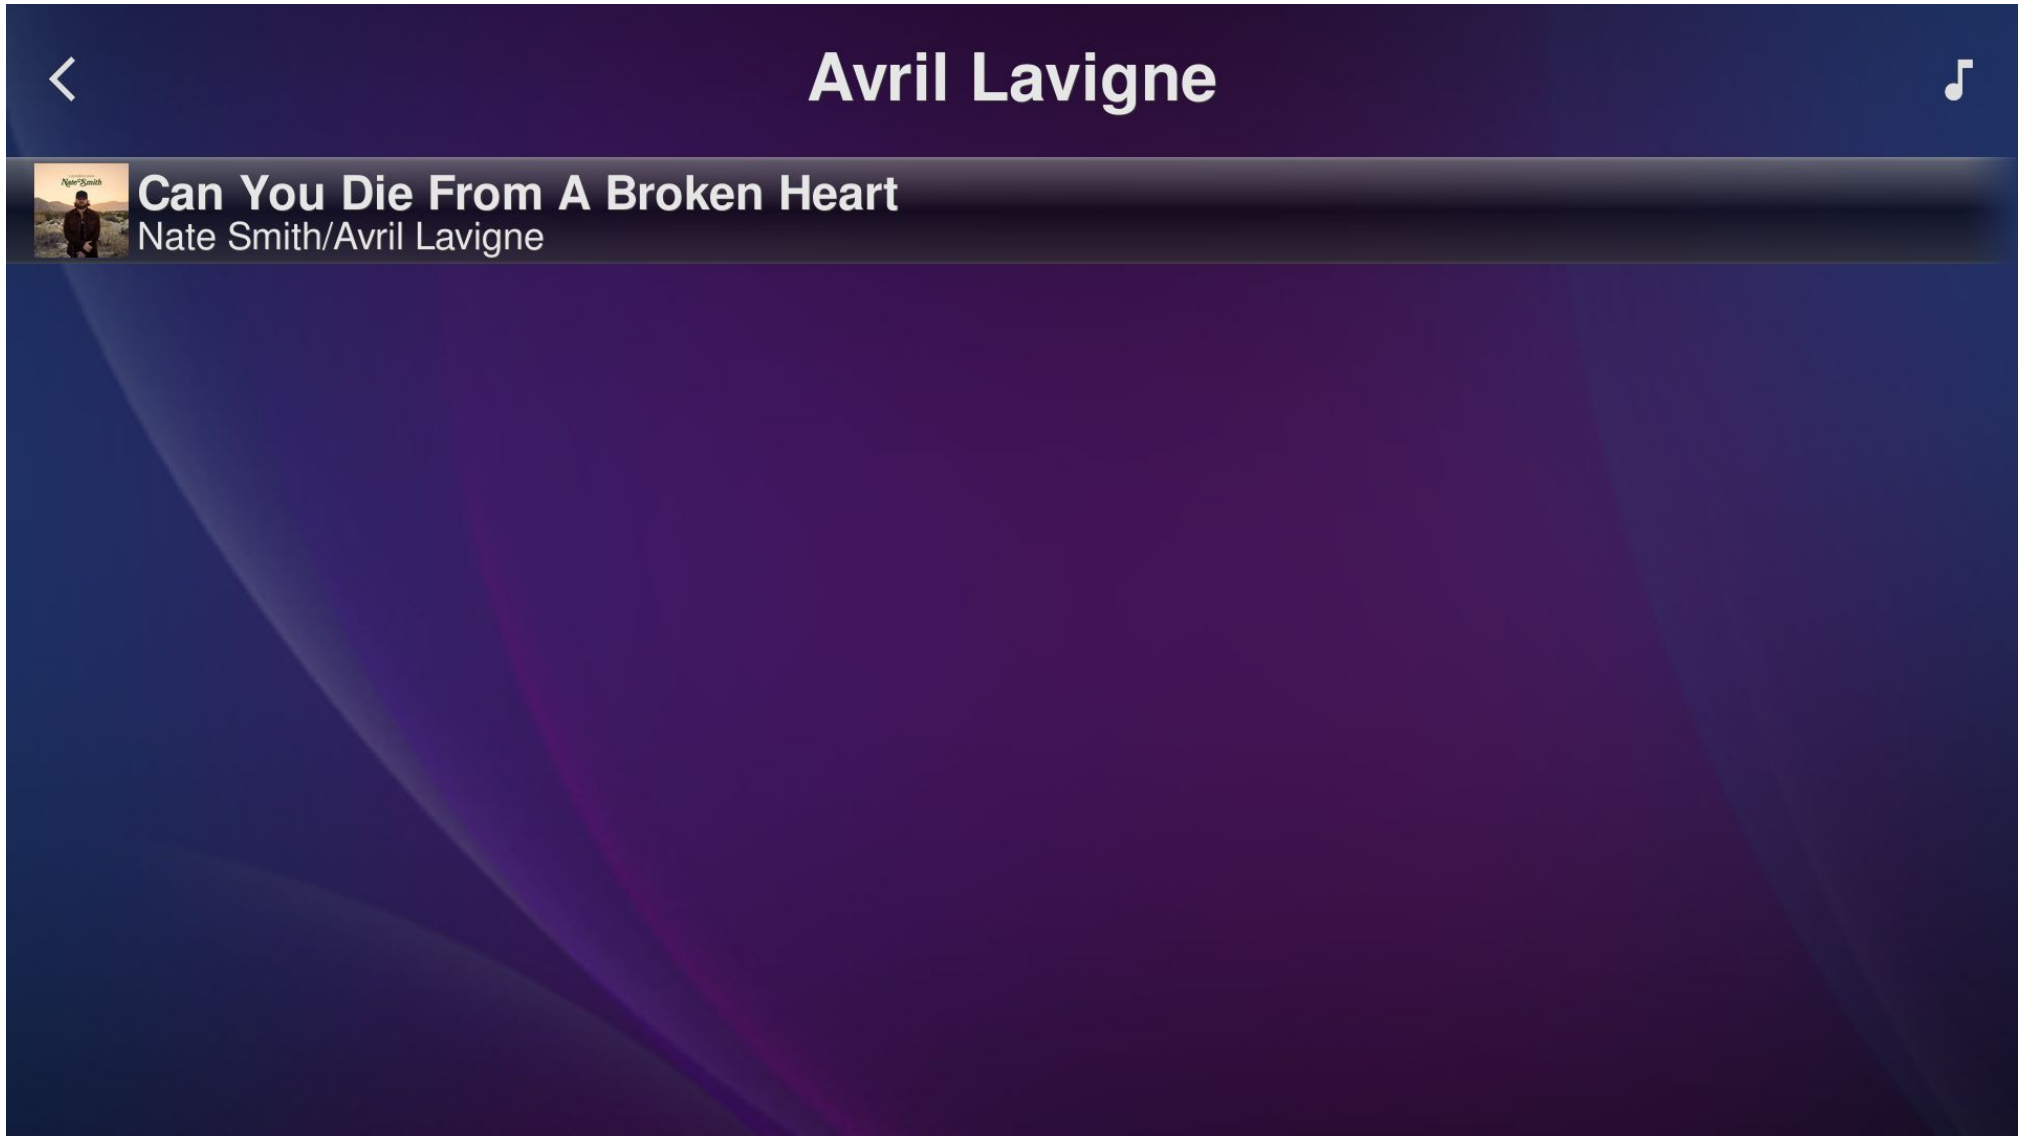

All Favorites, then one entry per type.

My Music - Artists

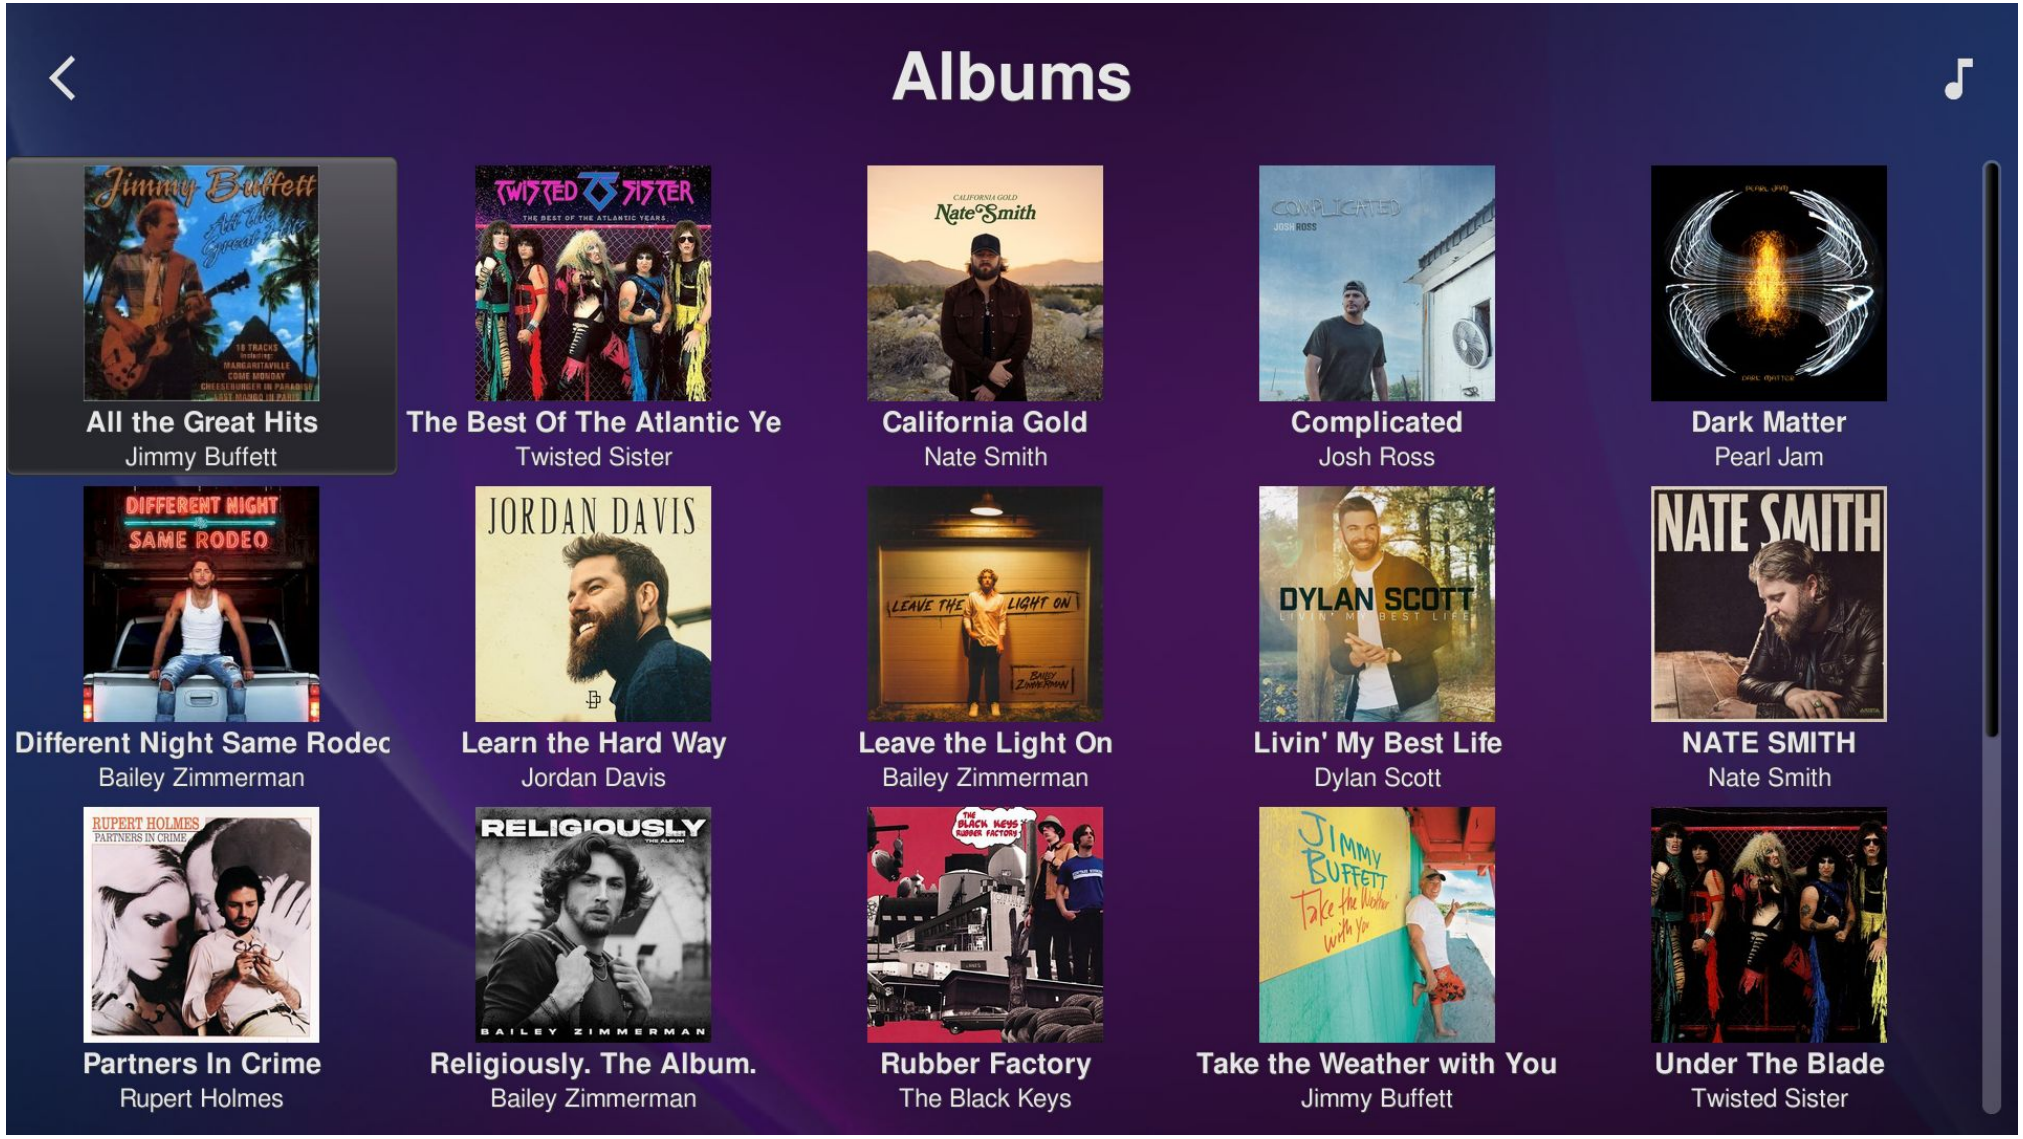

My Music - Artists - Avril Lavigne

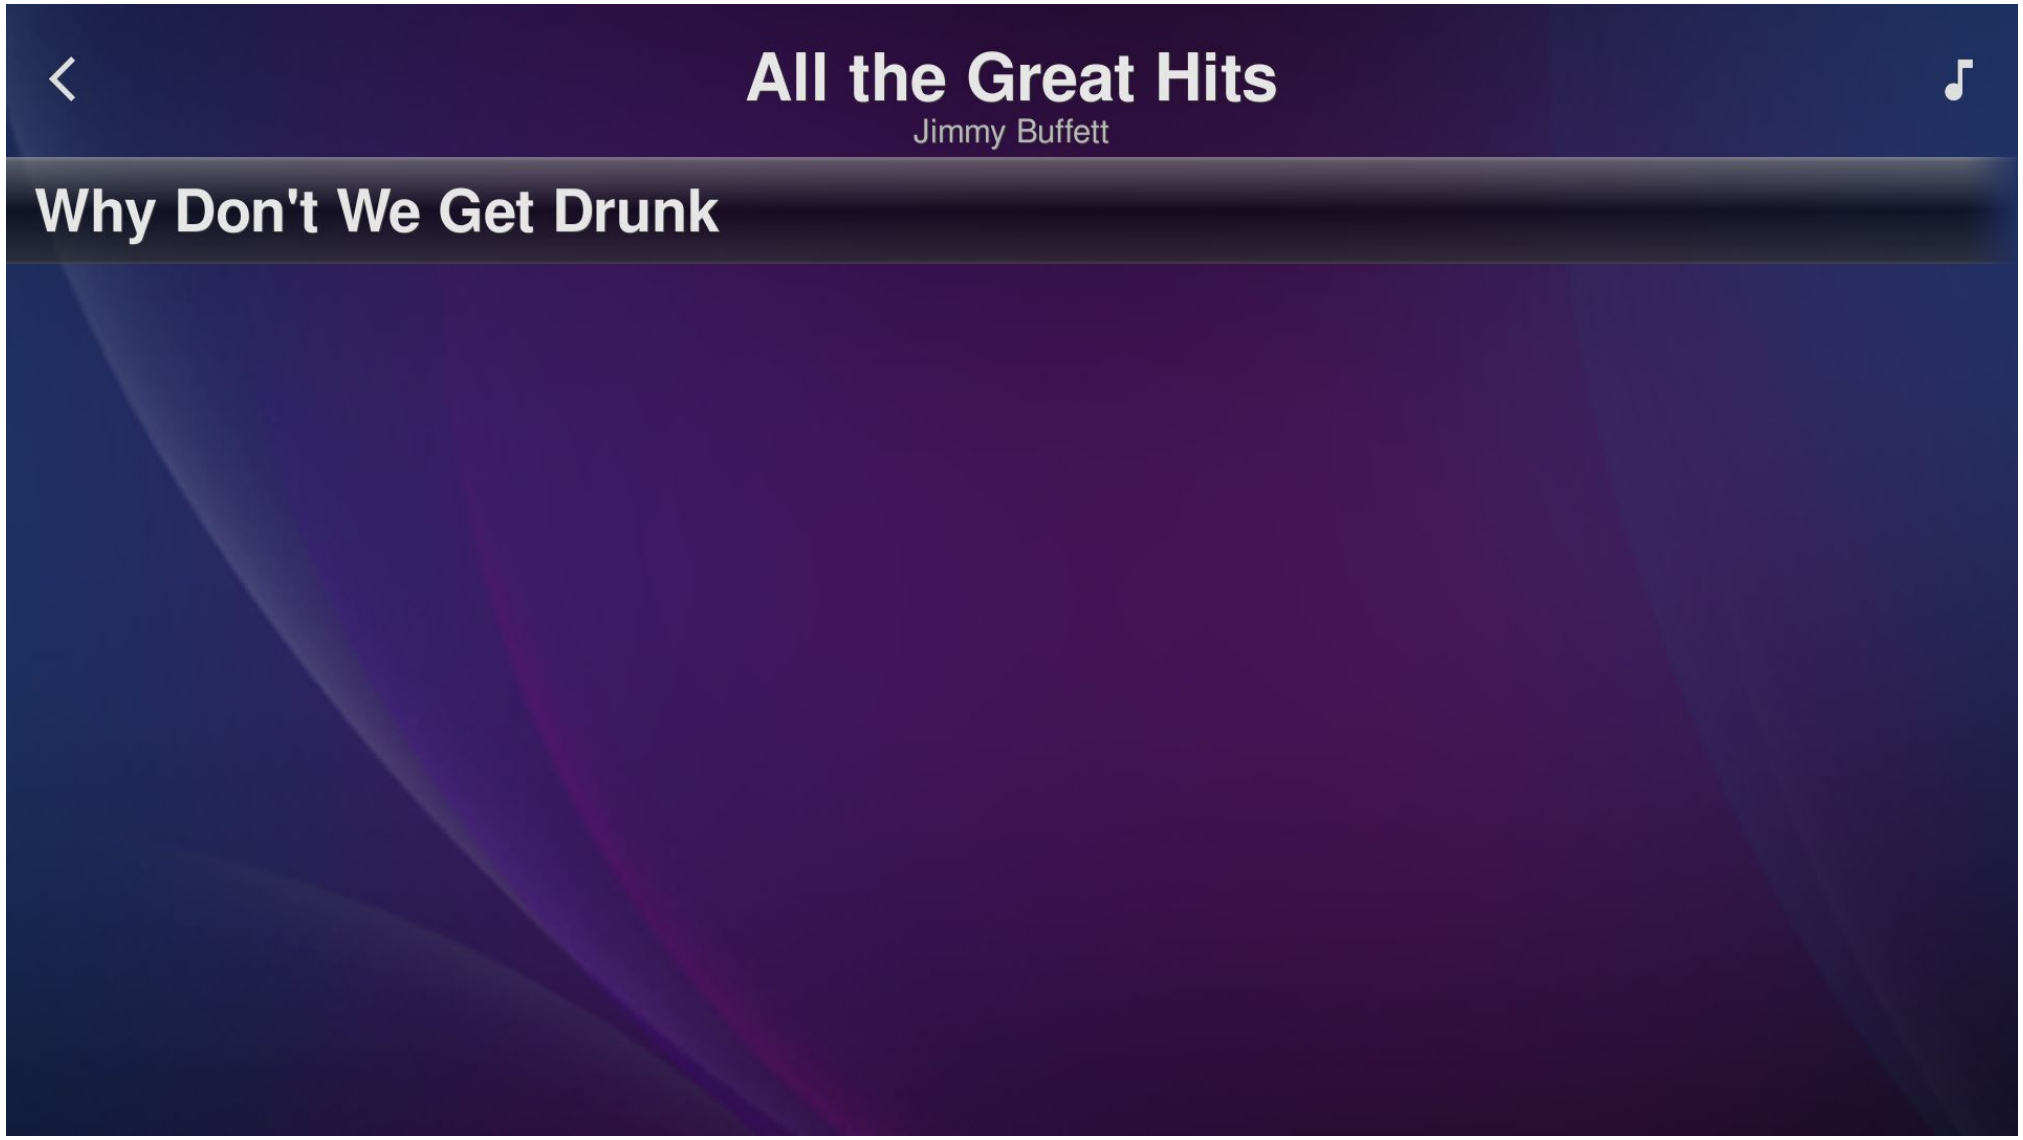

An artist who is only on one track (a featured artist). The view lists albums, then tracks not on those albums, then matching radio stations.

My Music - Albums

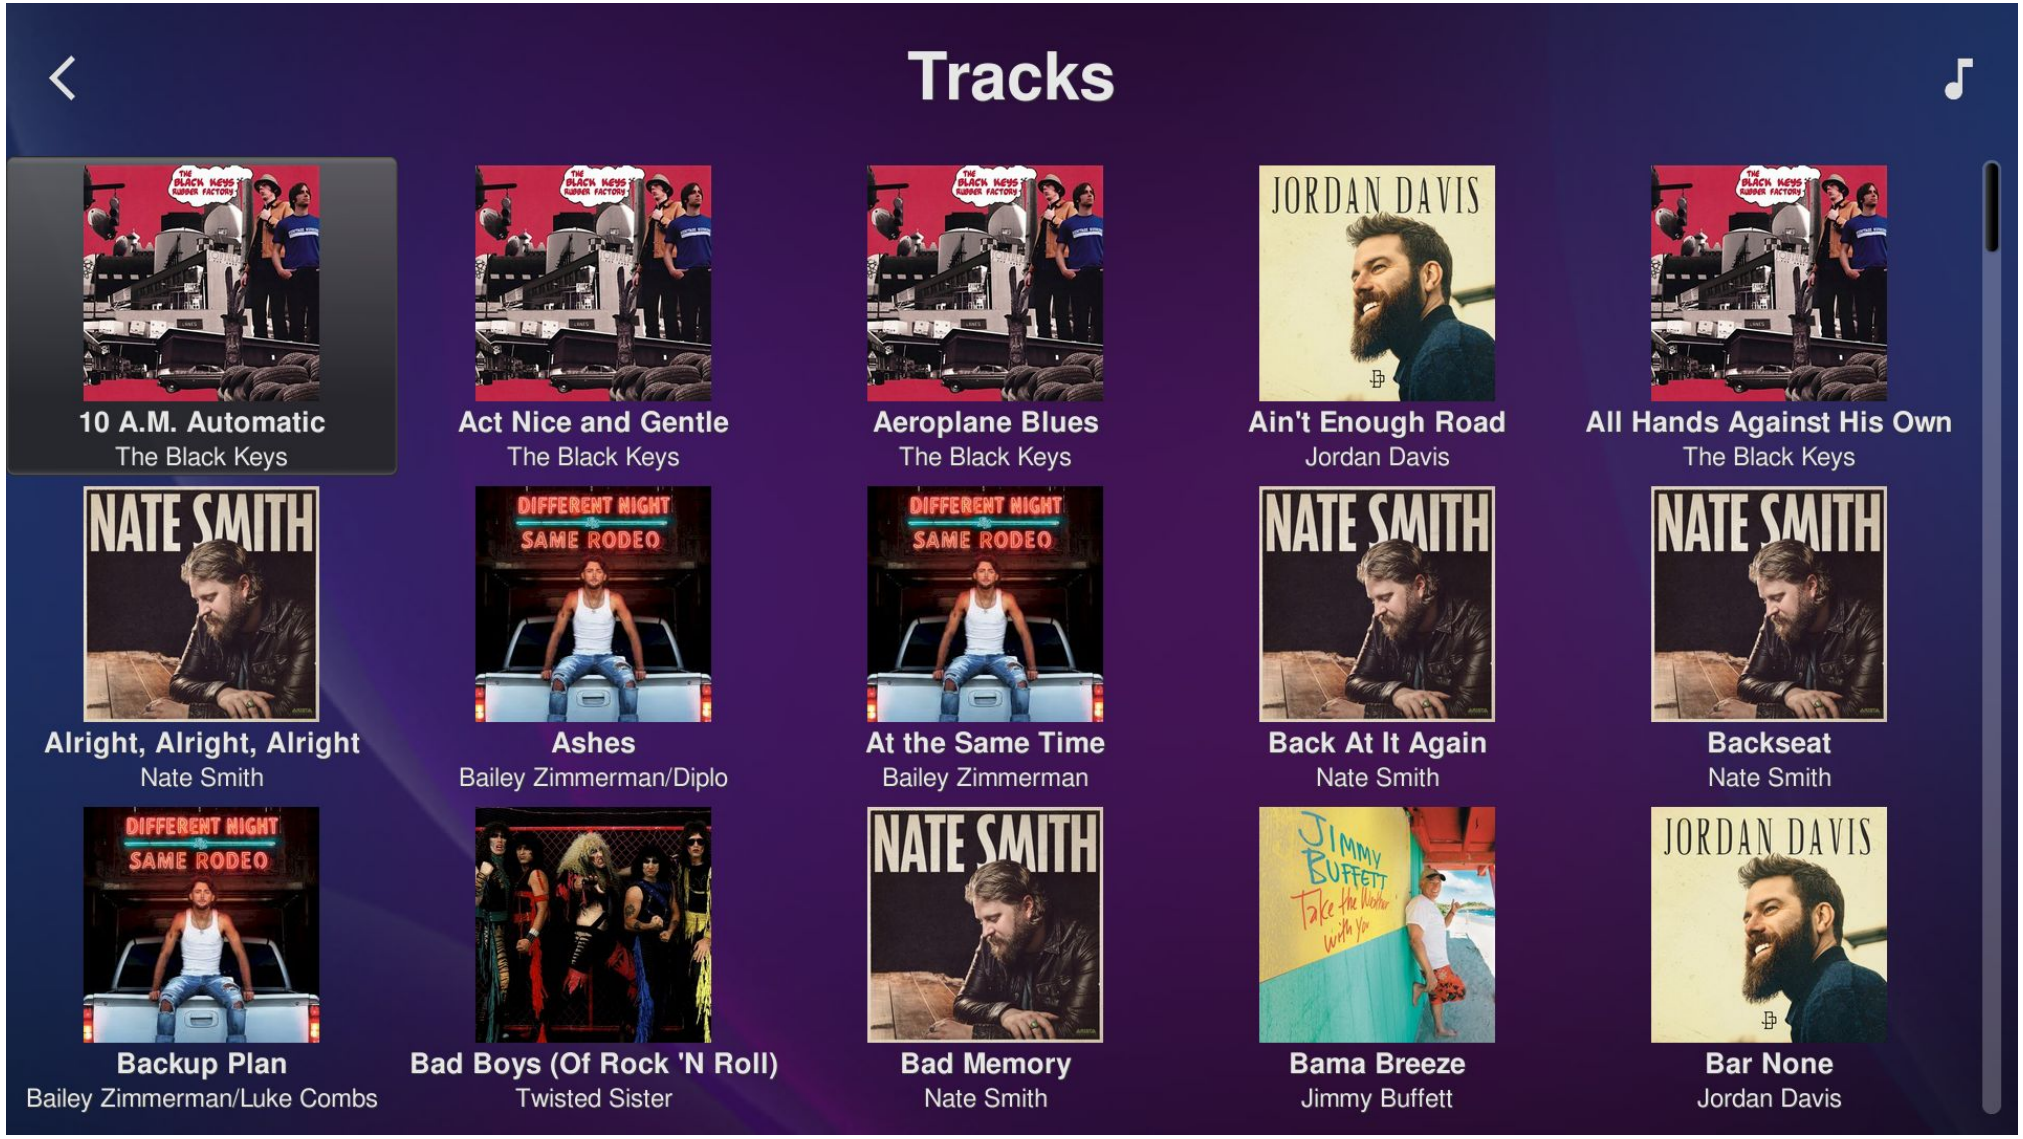

My Music - Albums - an album

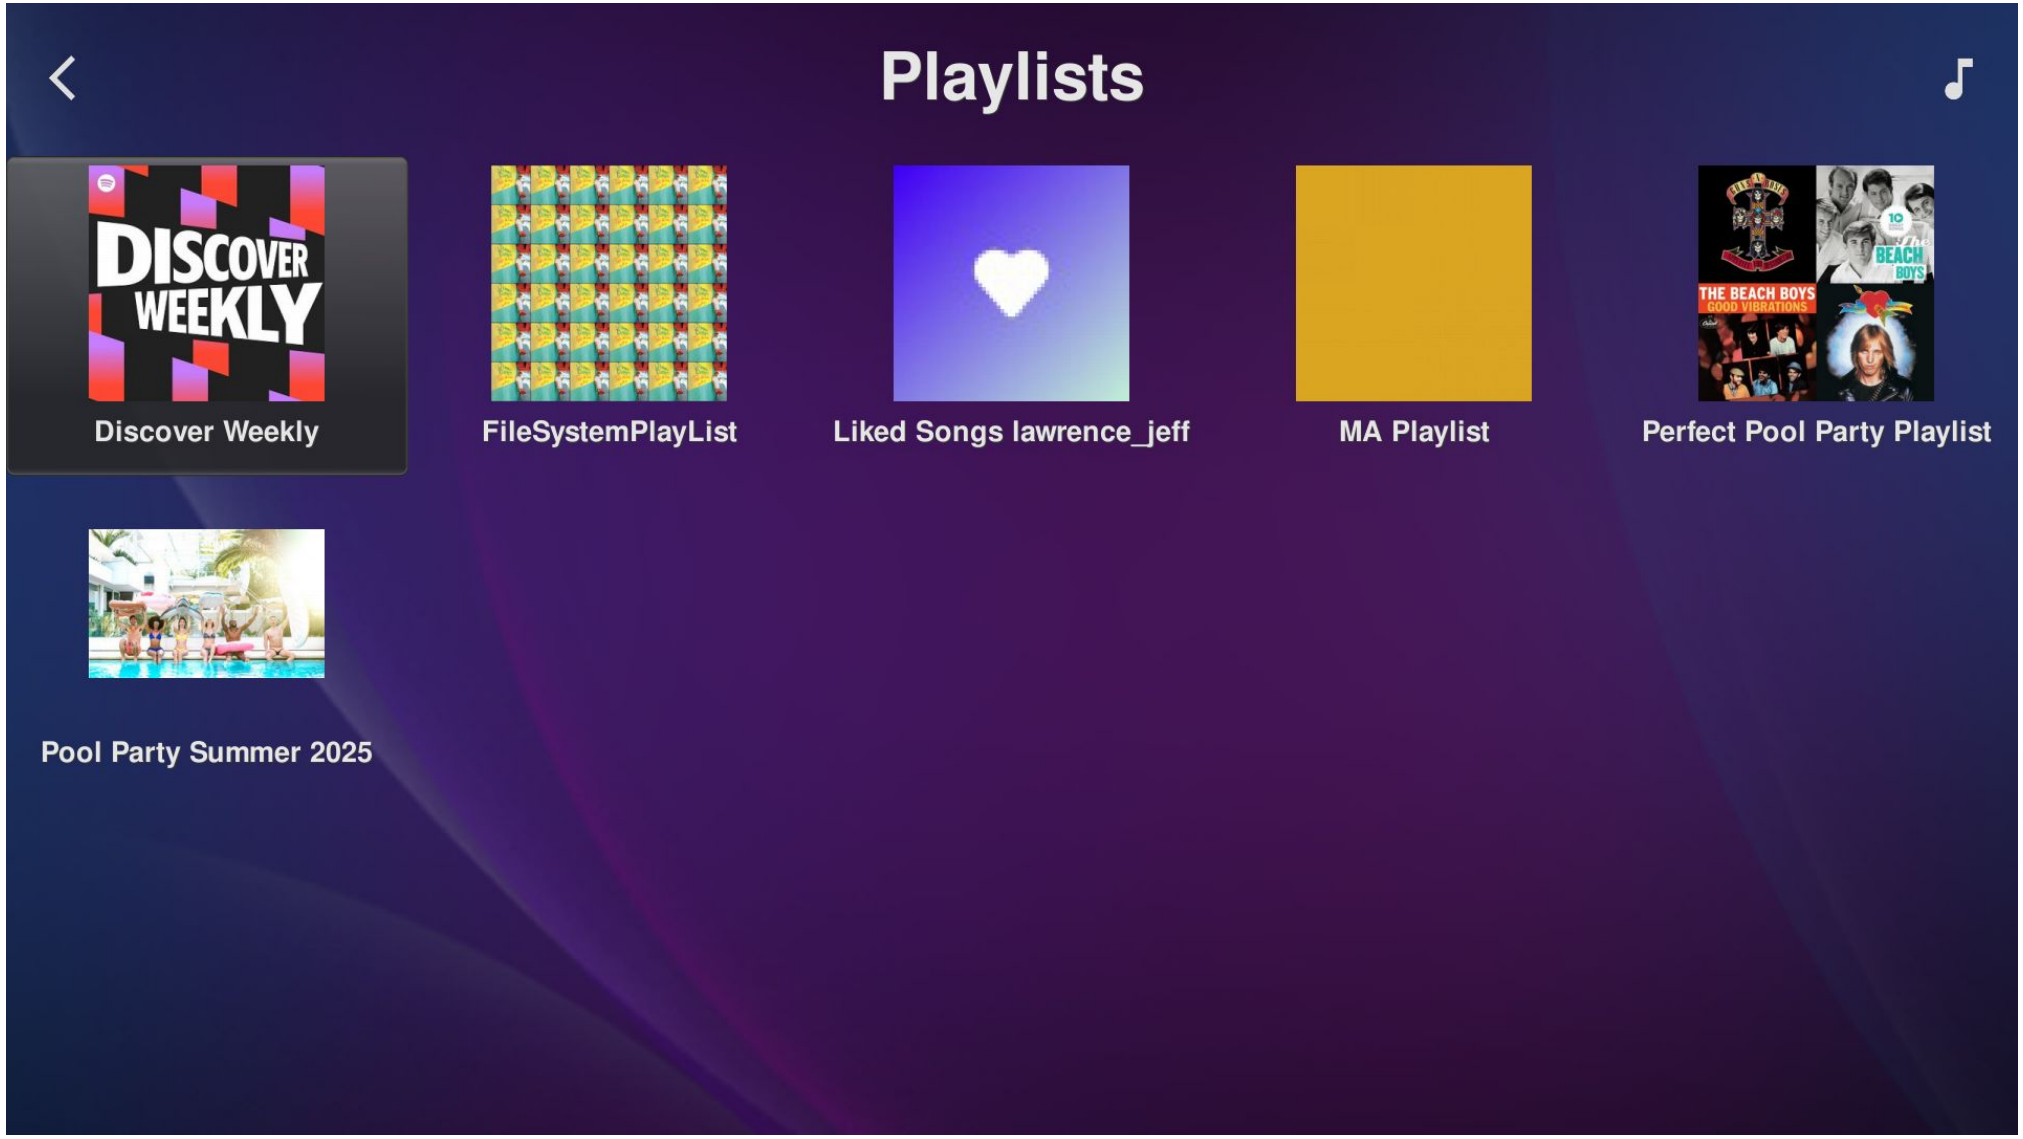

Tracks of one album. Tapping a track adds it (plays it when the queue is idle); long press for Play Album from here.

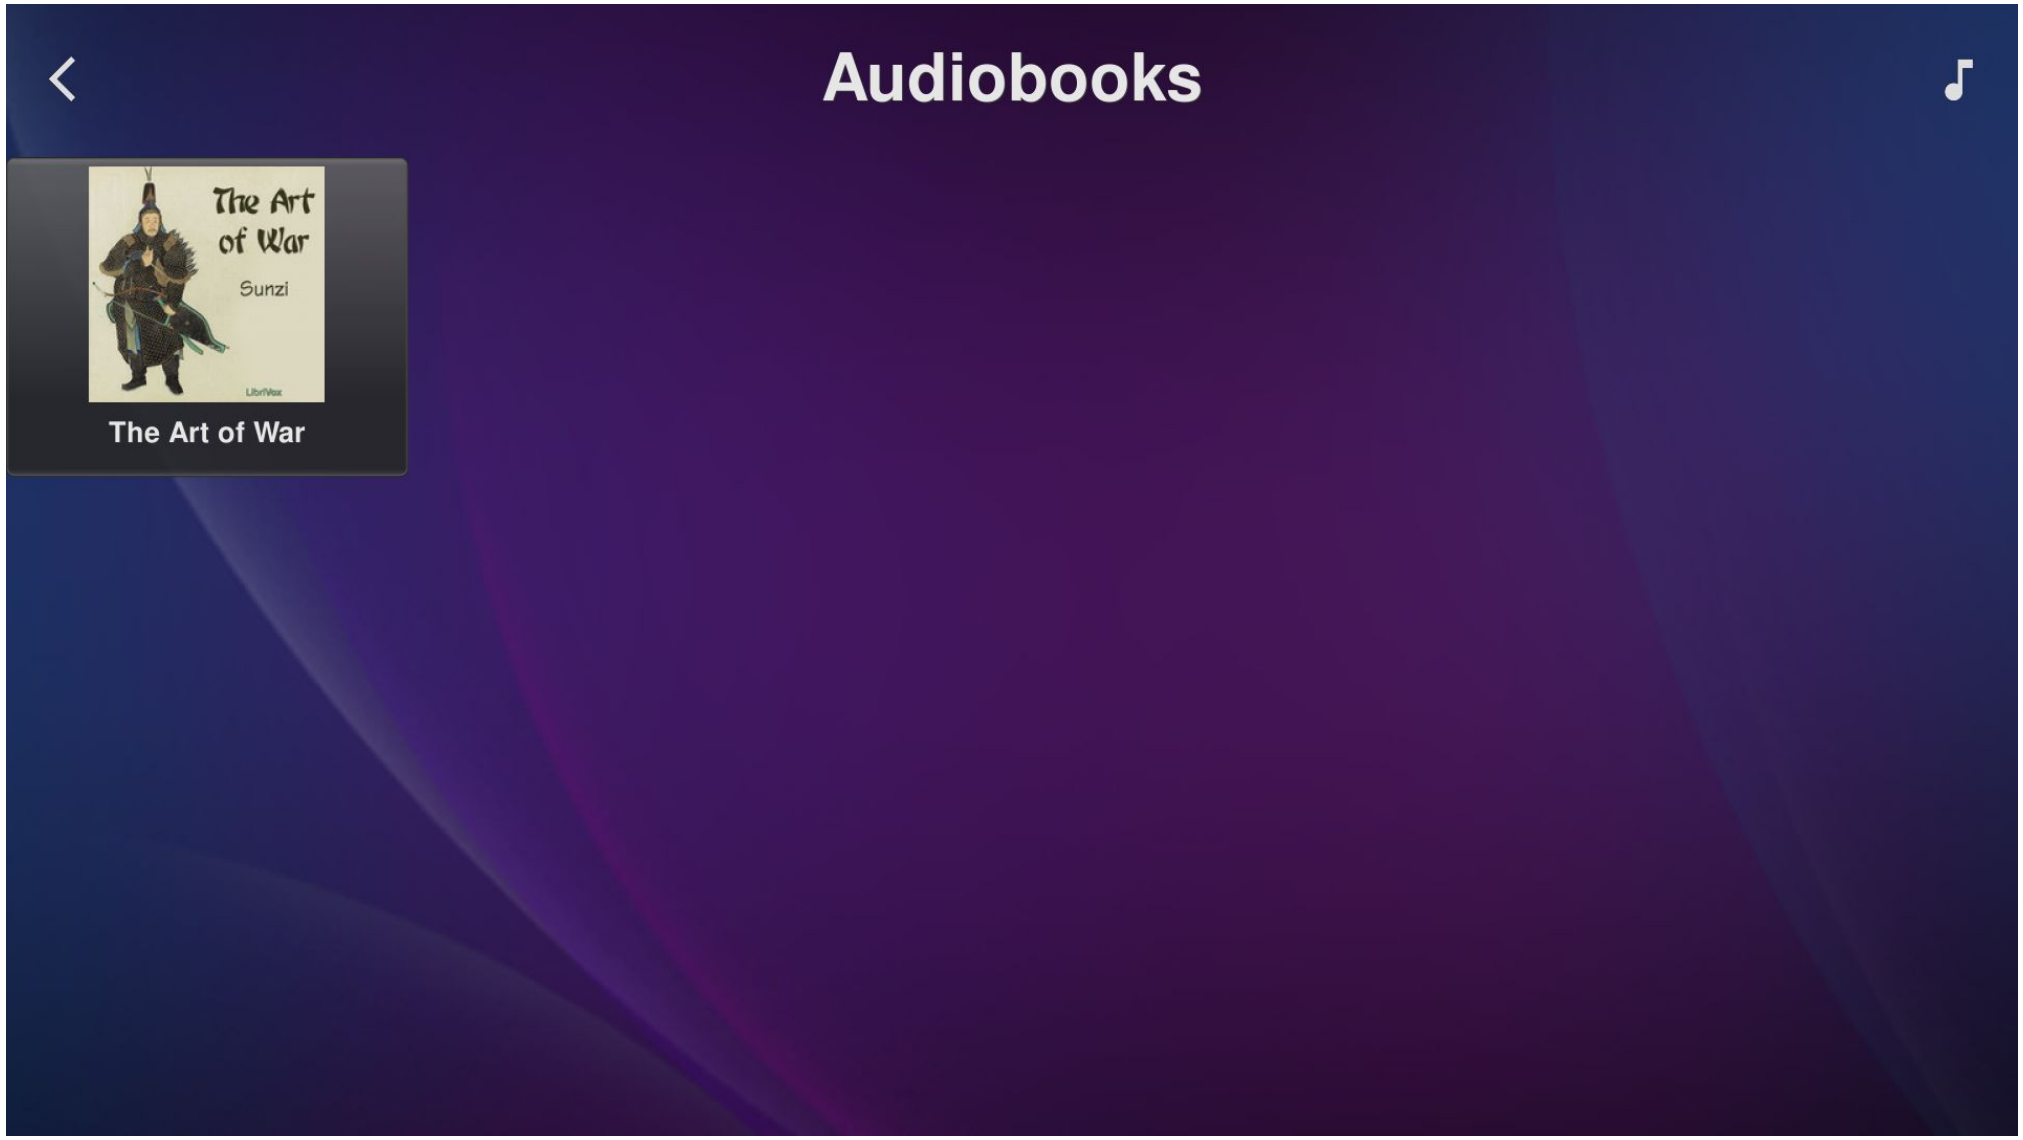

My Music - Tracks

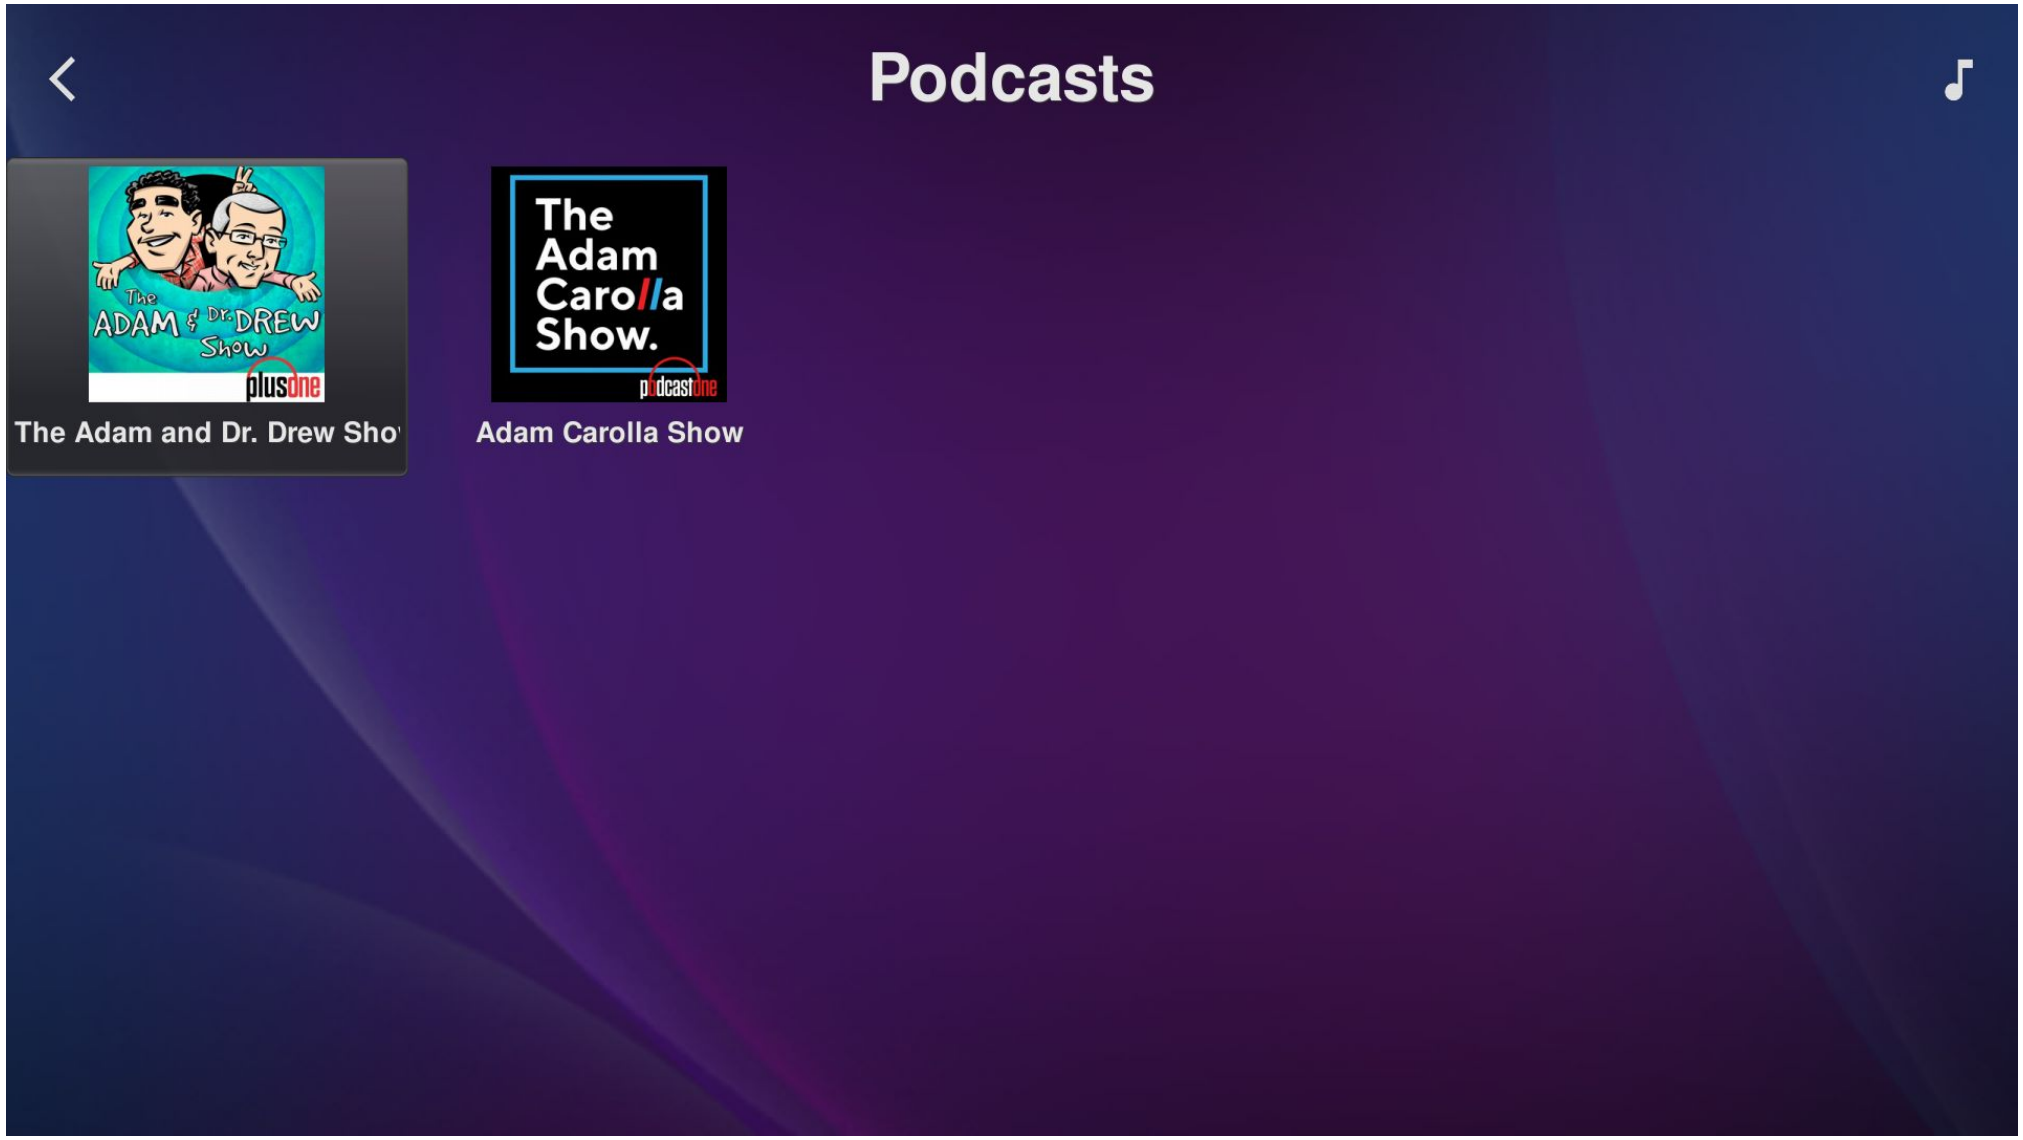

My Music - Playlists

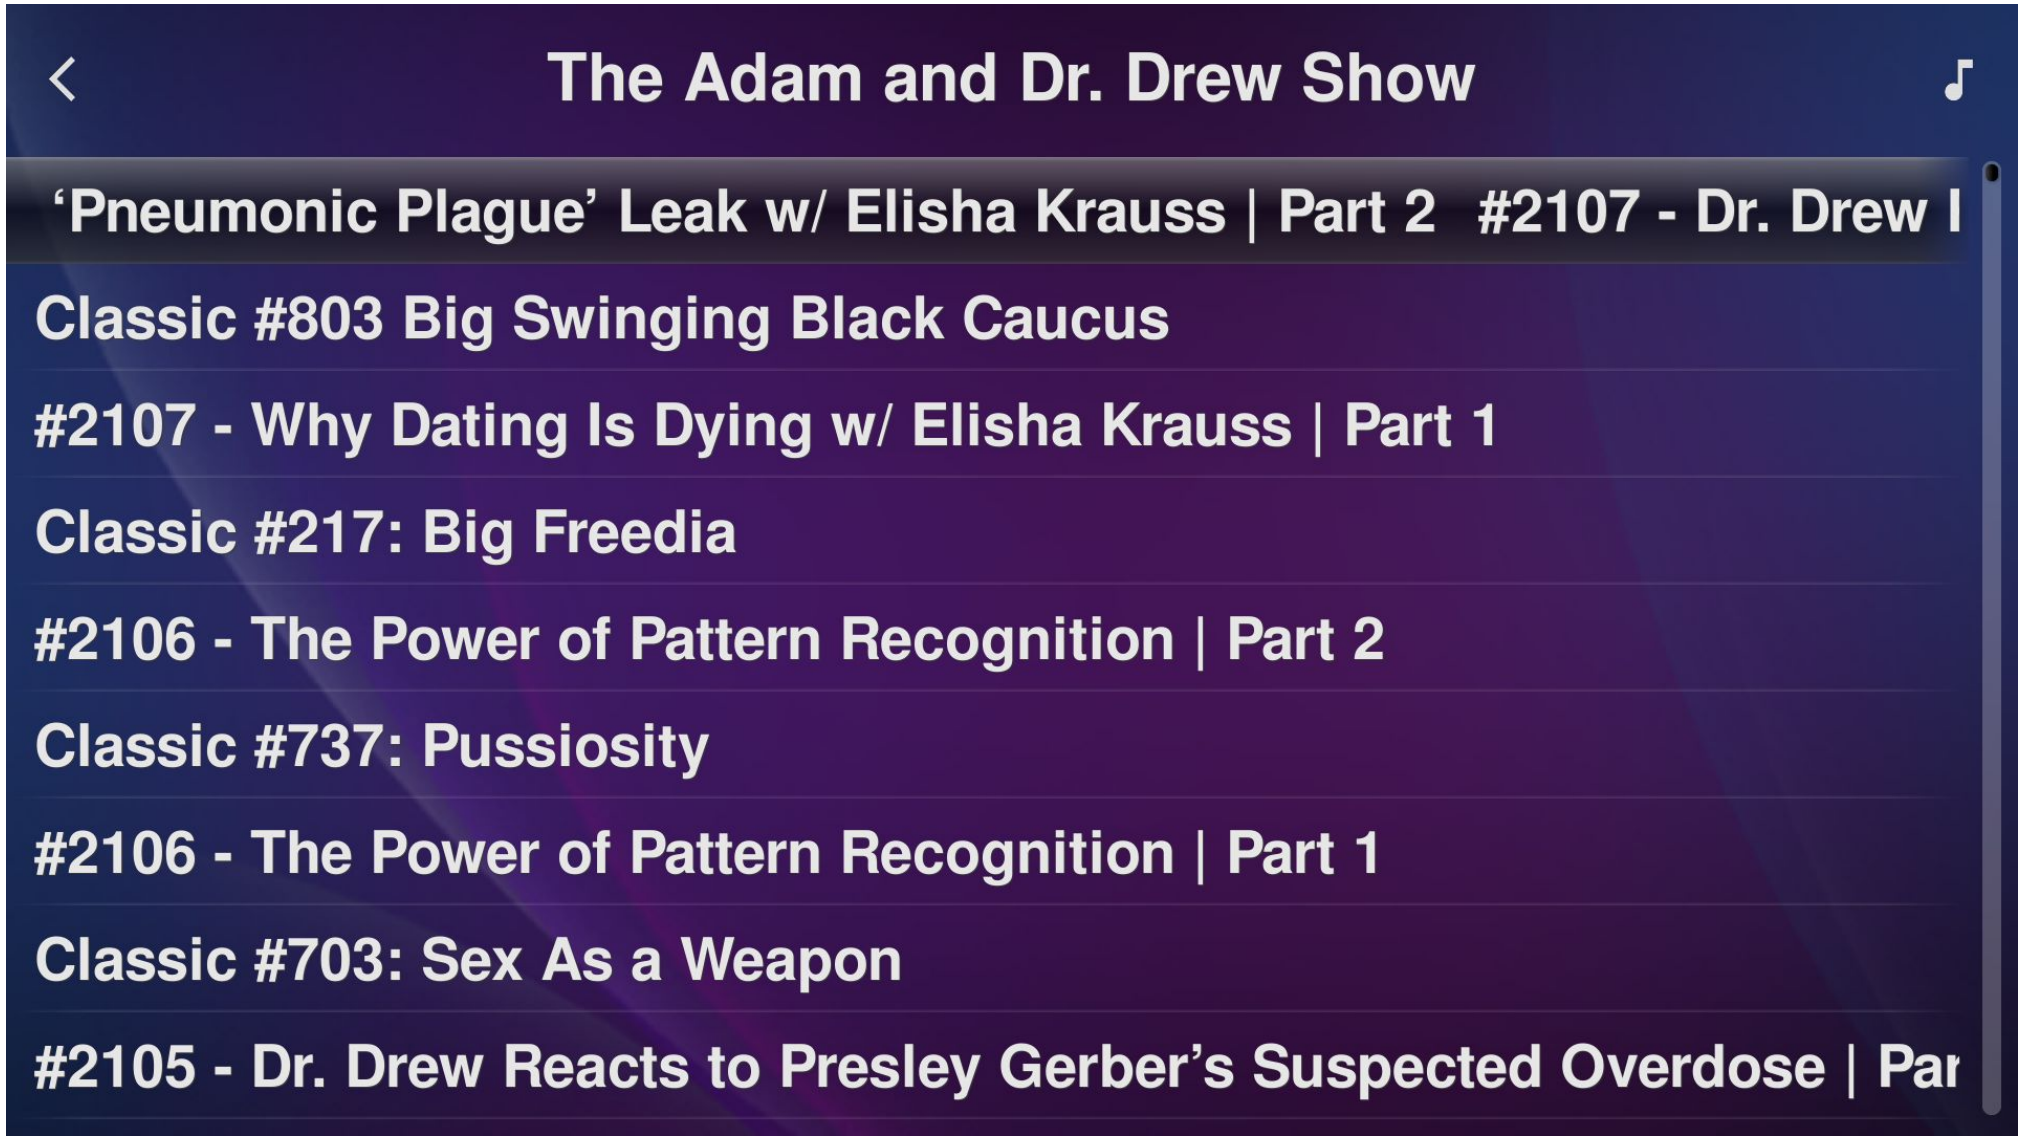

My Music - Audiobooks

My Music - Podcasts

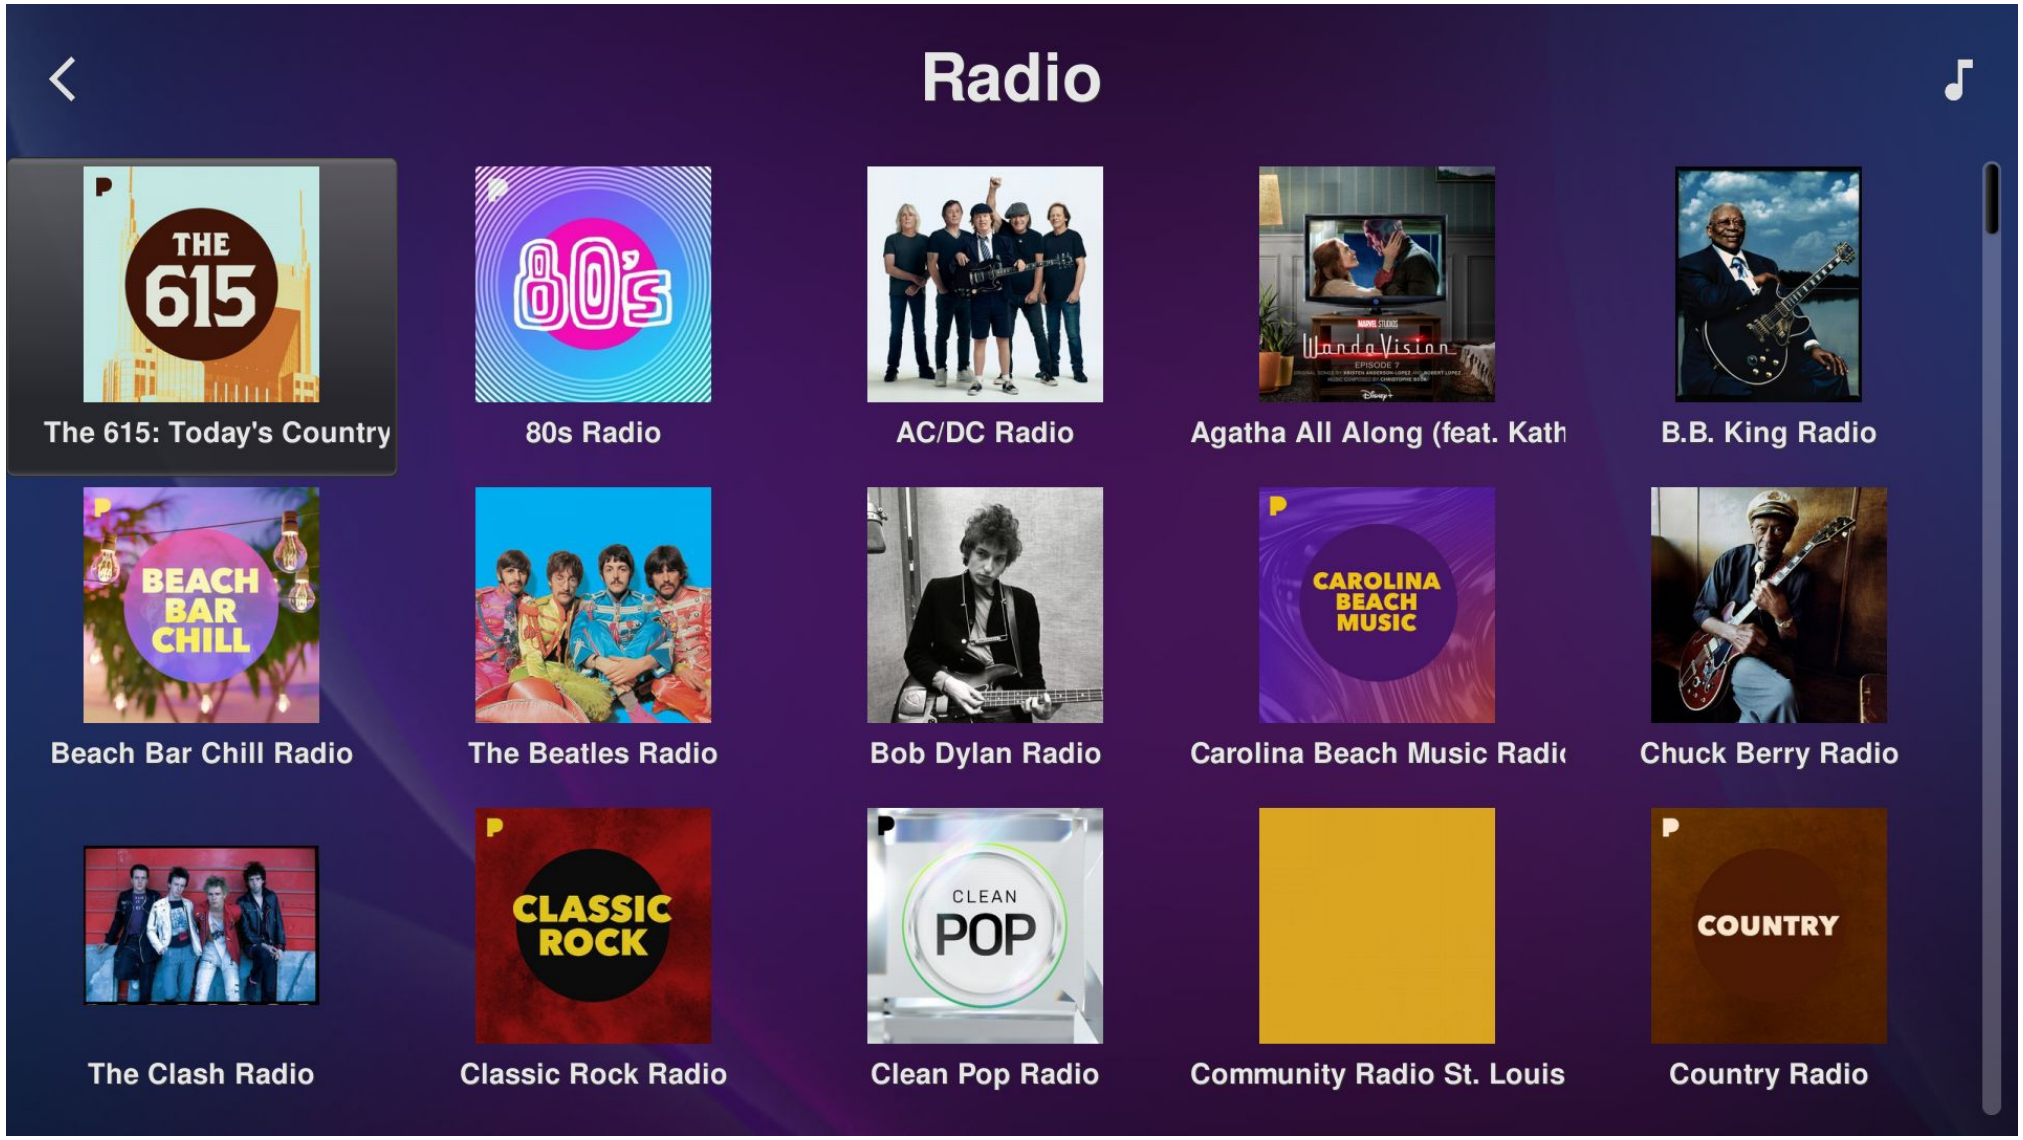

My Music - Podcasts - a podcast

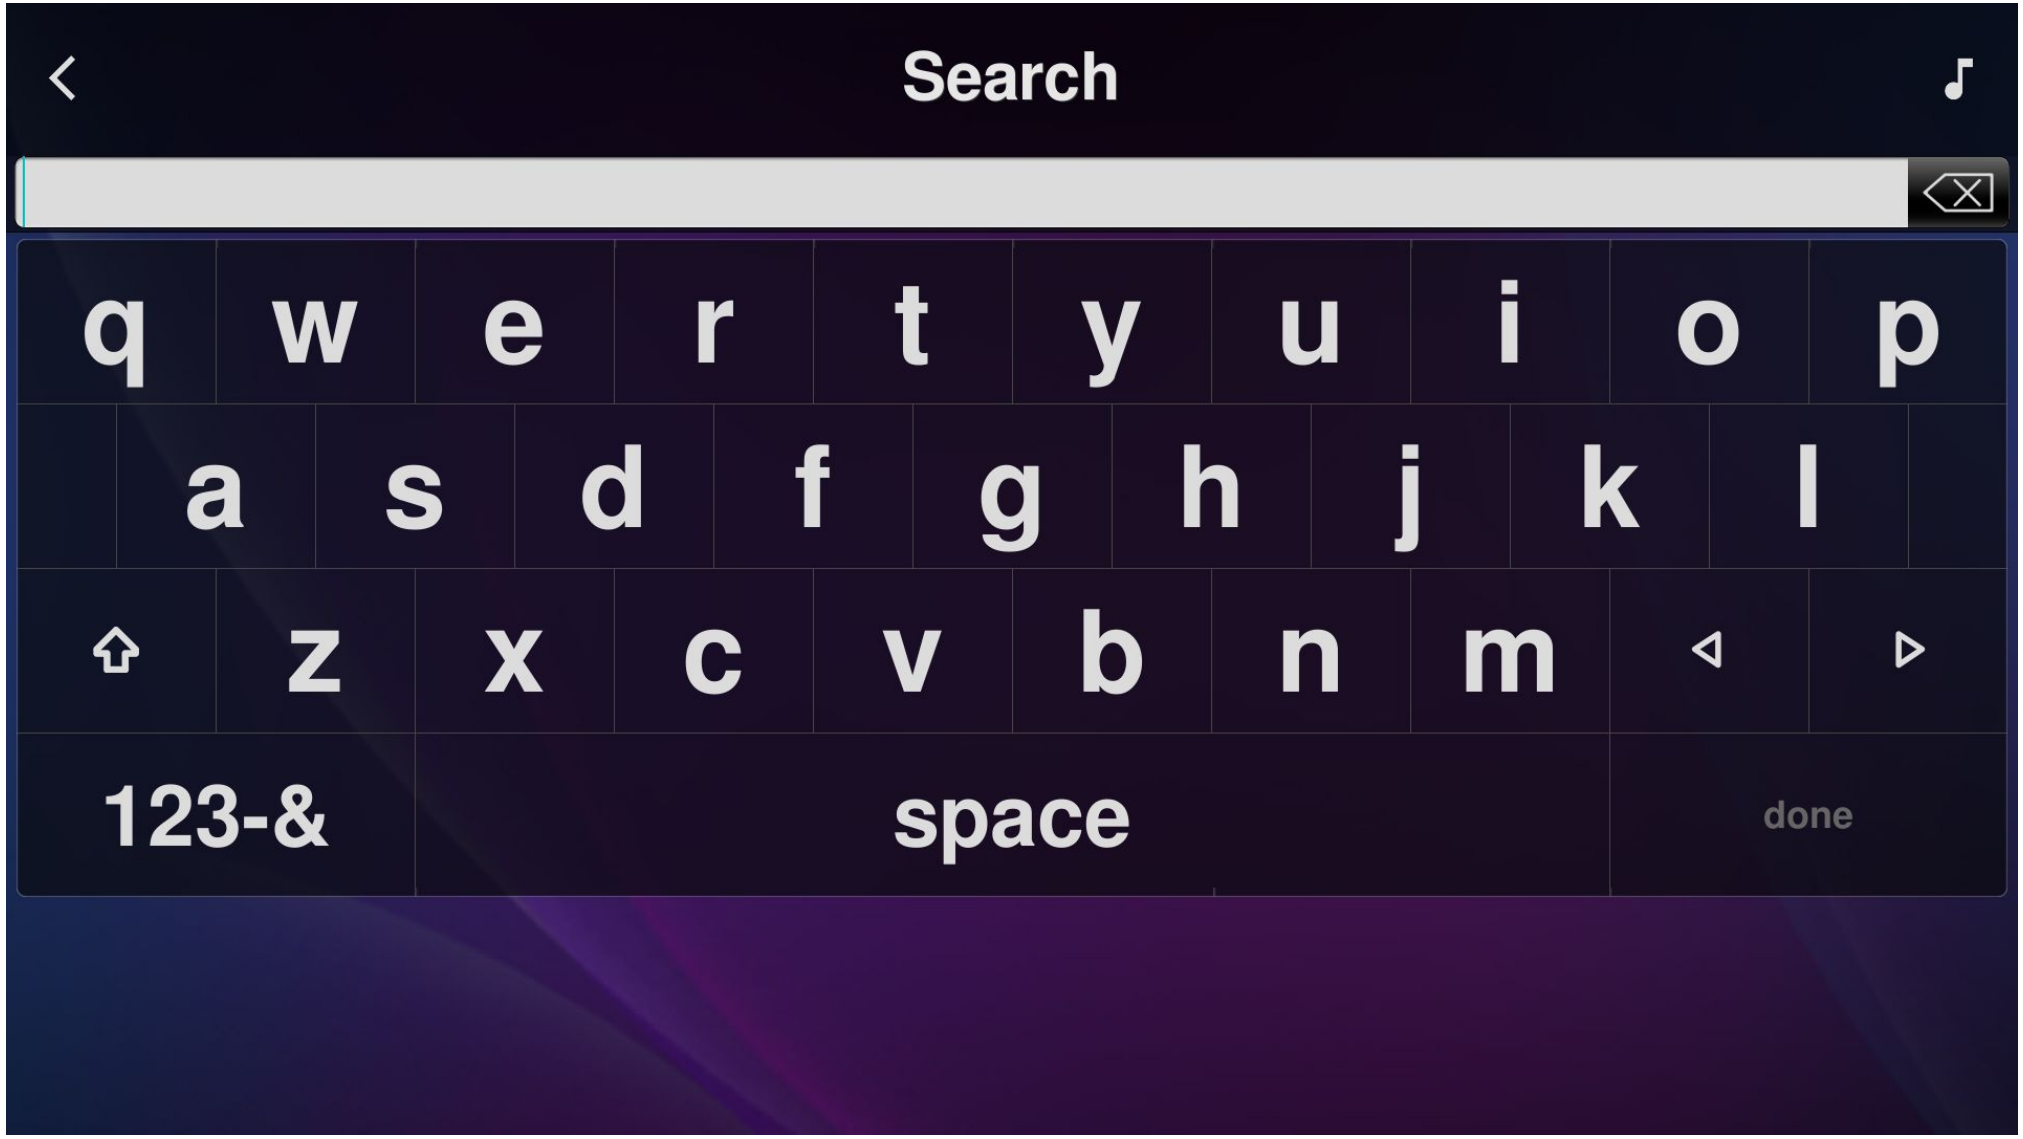

Episodes of one podcast.

My Music - Radio

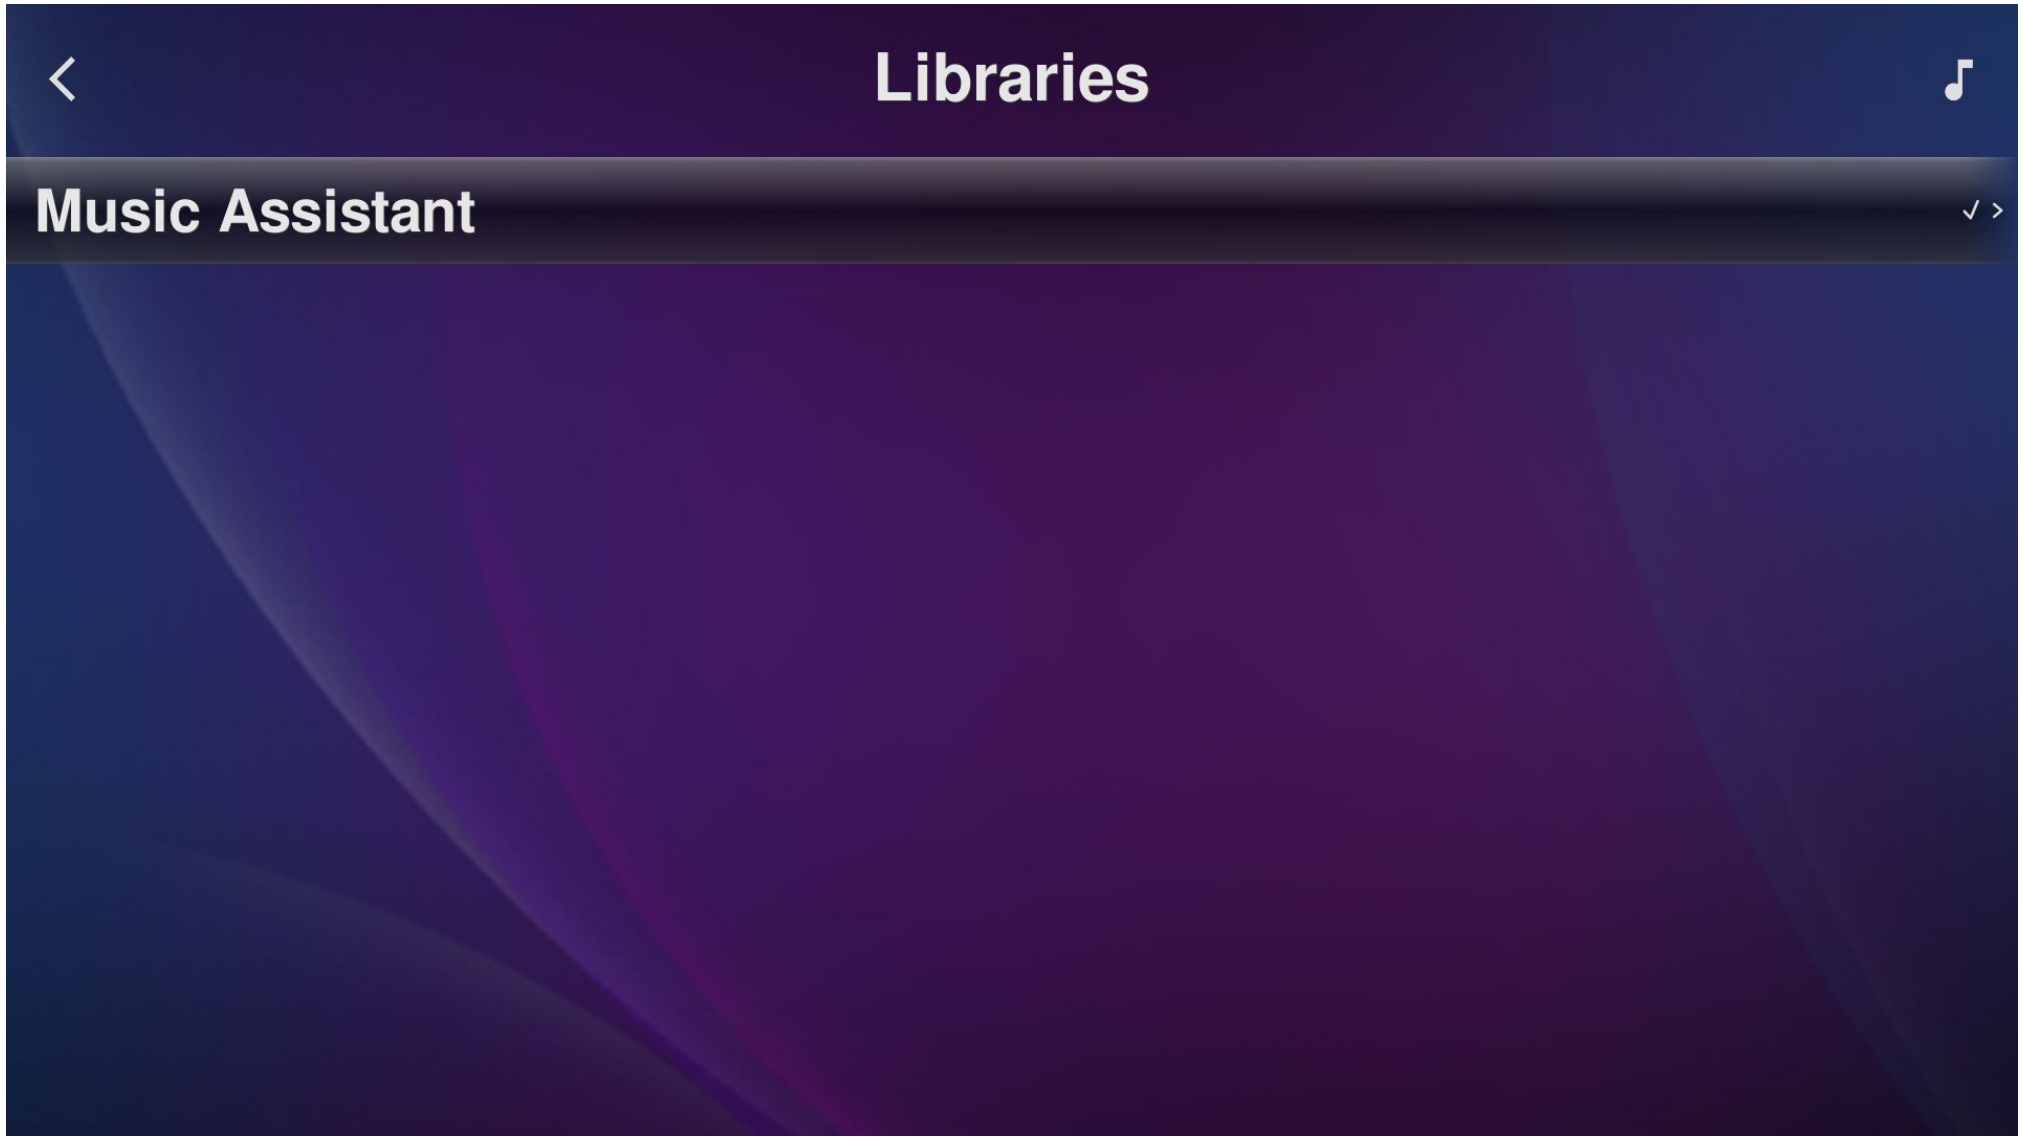

My Music - Search

The search text entry.

My Music - Switch Library

Settings

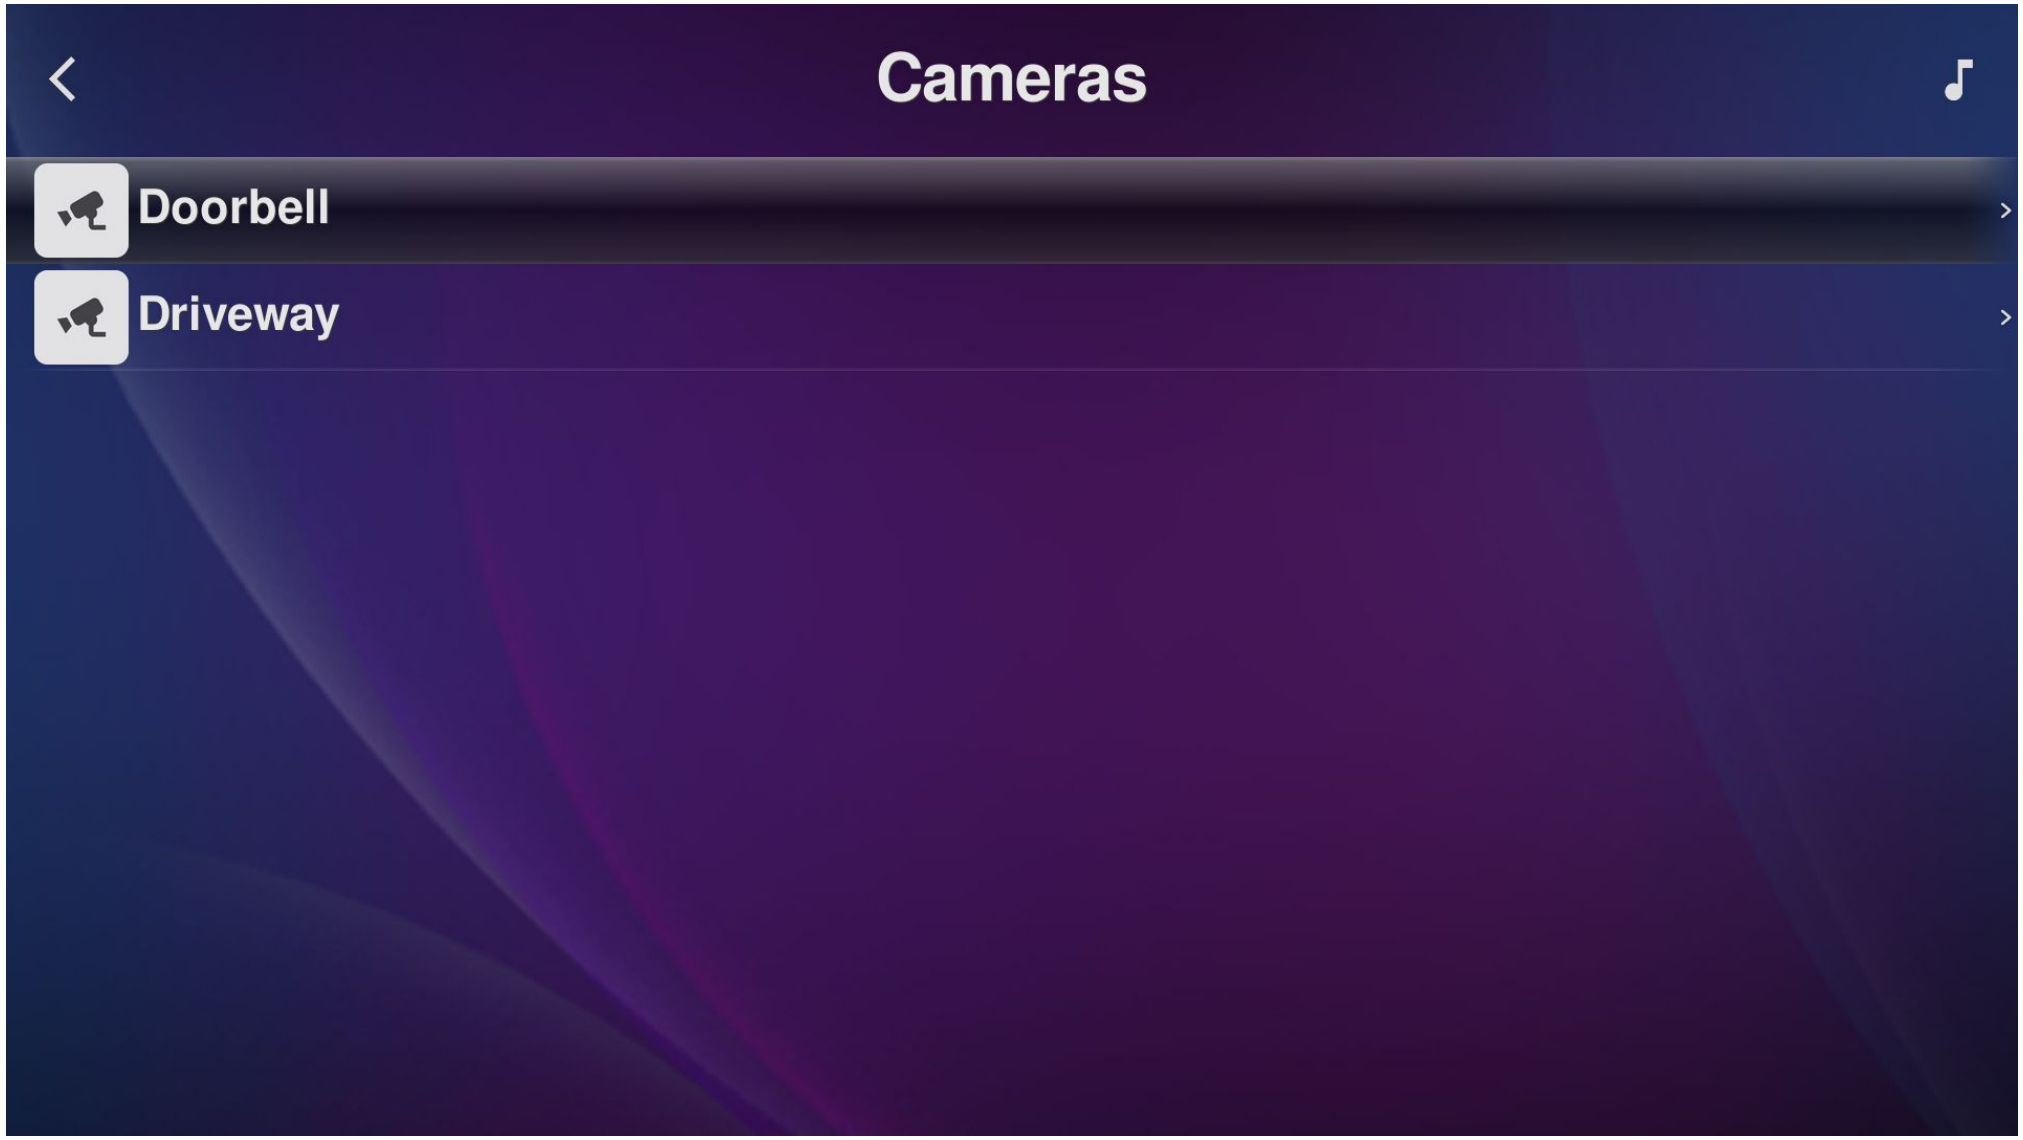

Includes Alarm Clock (says alarms are not supported) and HA Extras.

Settings - HA Extras

Experimental. Needs the device setting 'Expose HA Entities to Device (HA Extras)' and the HA Extras label on the entities.

Settings - HA Extras - Cameras

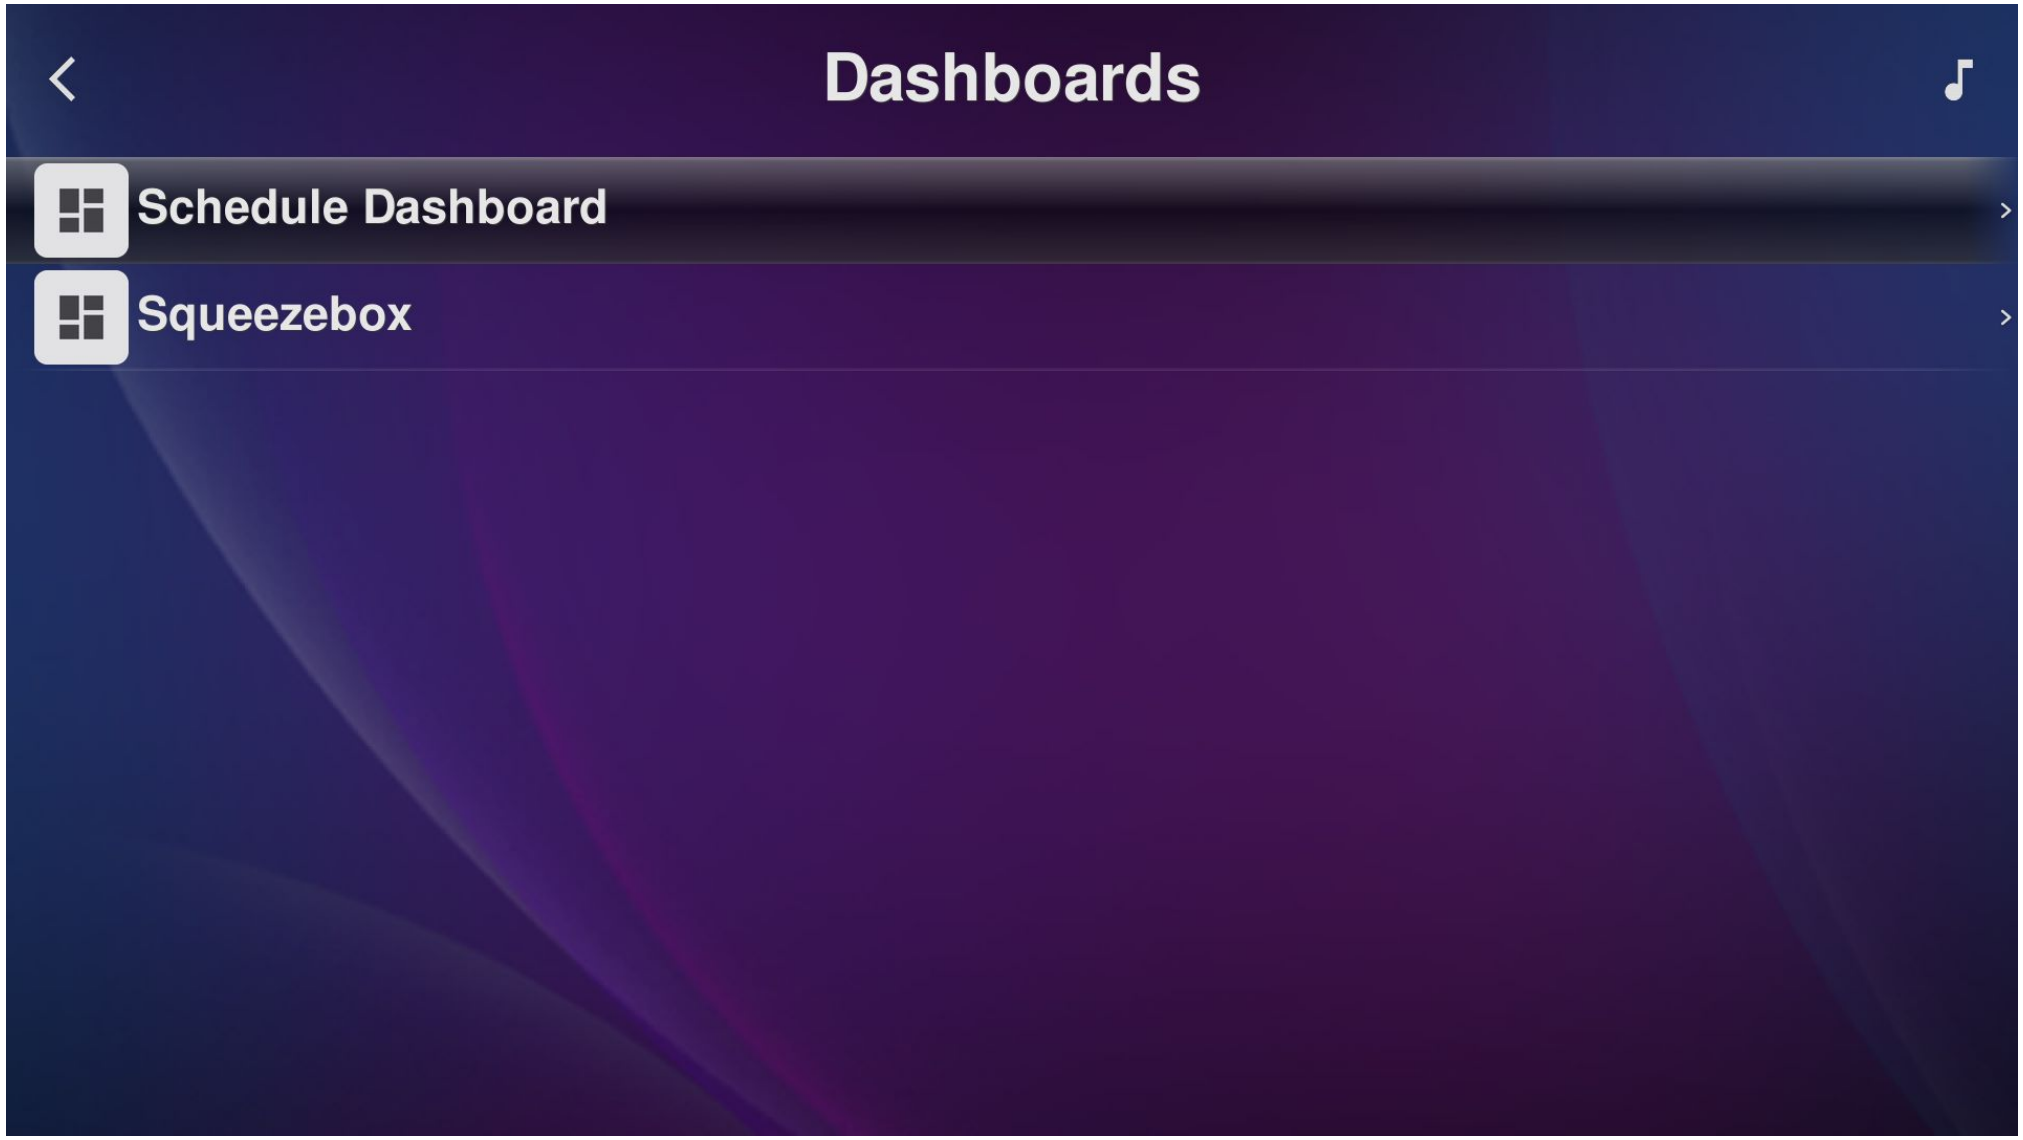

Choosing a camera shows a snapshot full screen in the Image Viewer, refreshed about every 10 seconds.

Settings - HA Extras - Cameras - Doorbell

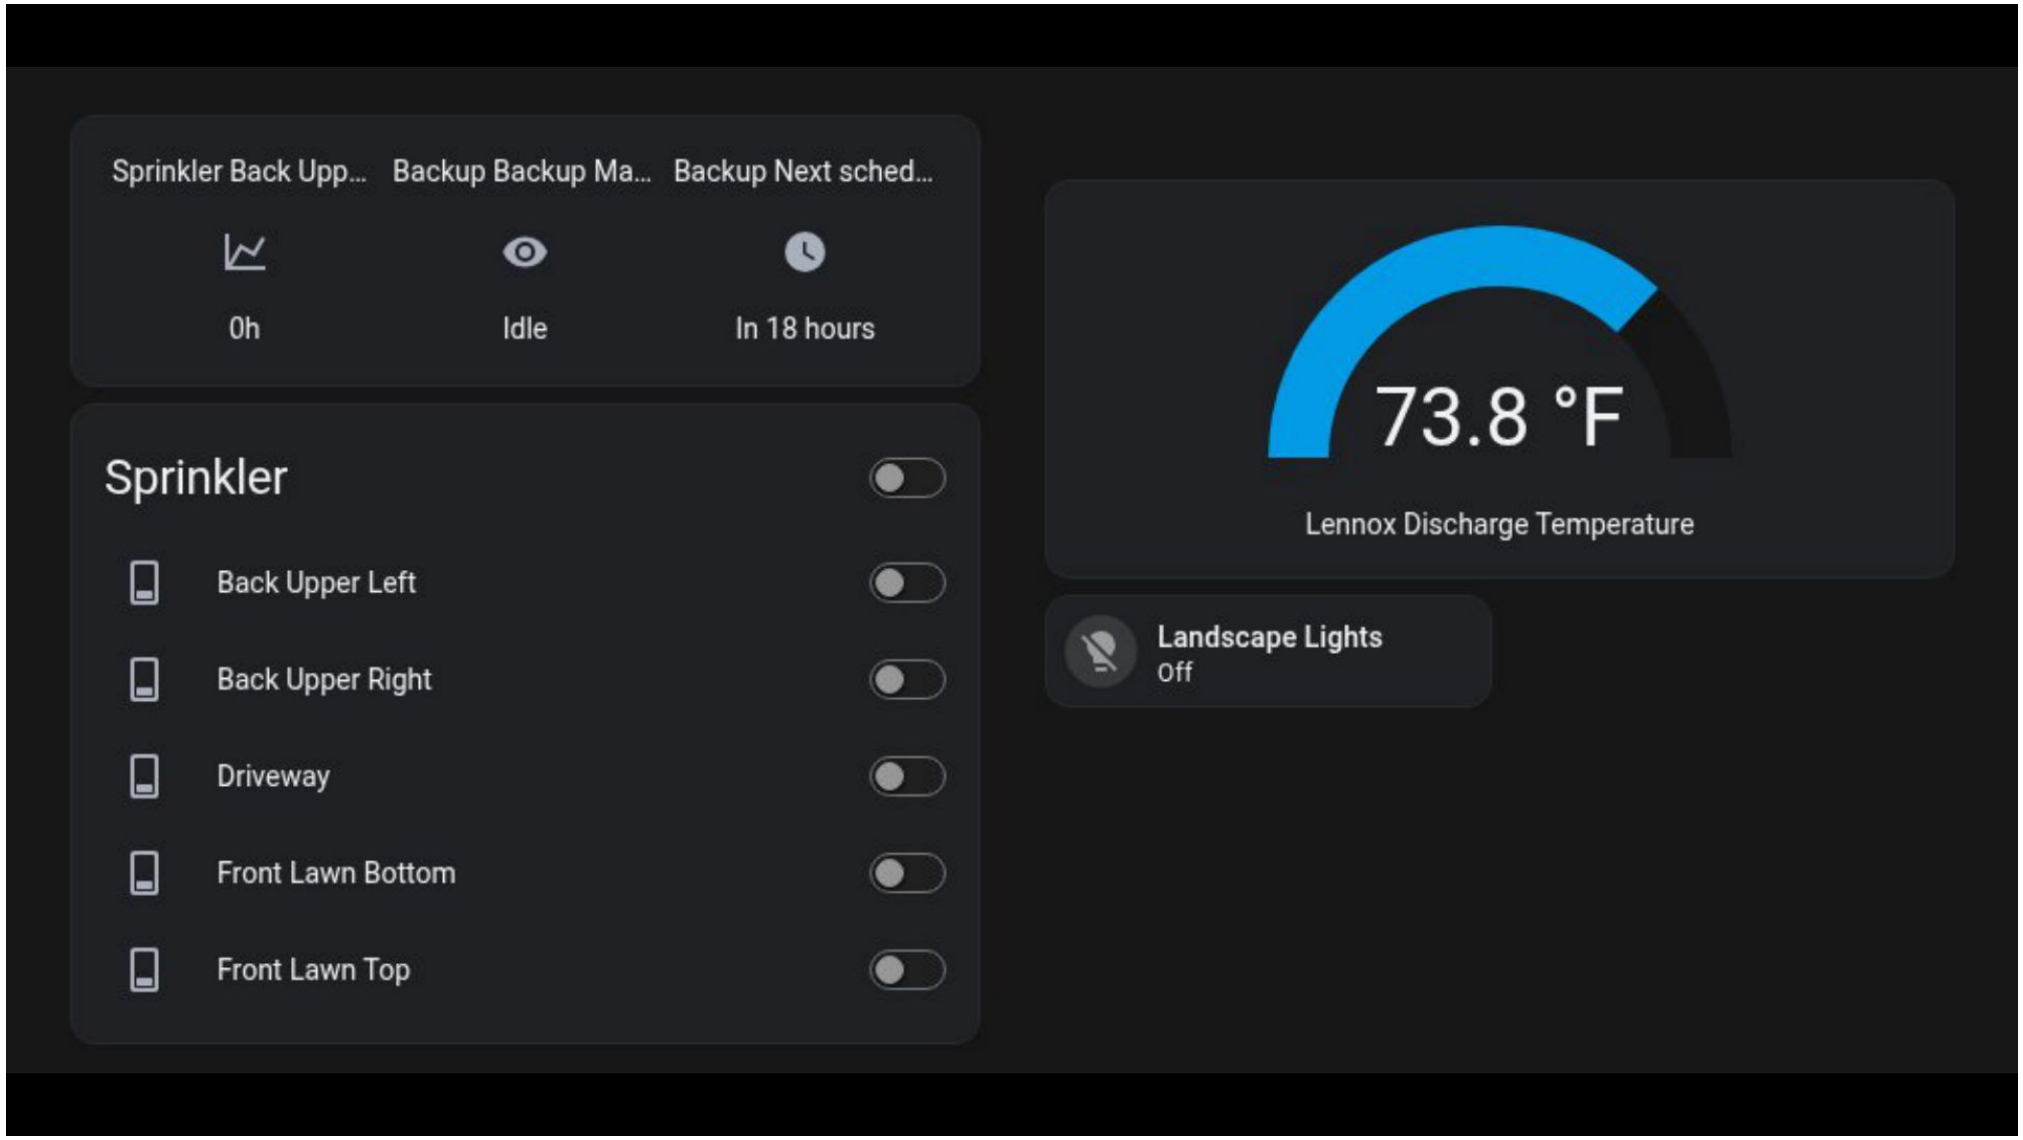

The camera view in the Image Viewer. It fetches a new snapshot about every 10 seconds until a key is pressed.

Settings - HA Extras - Dashboards

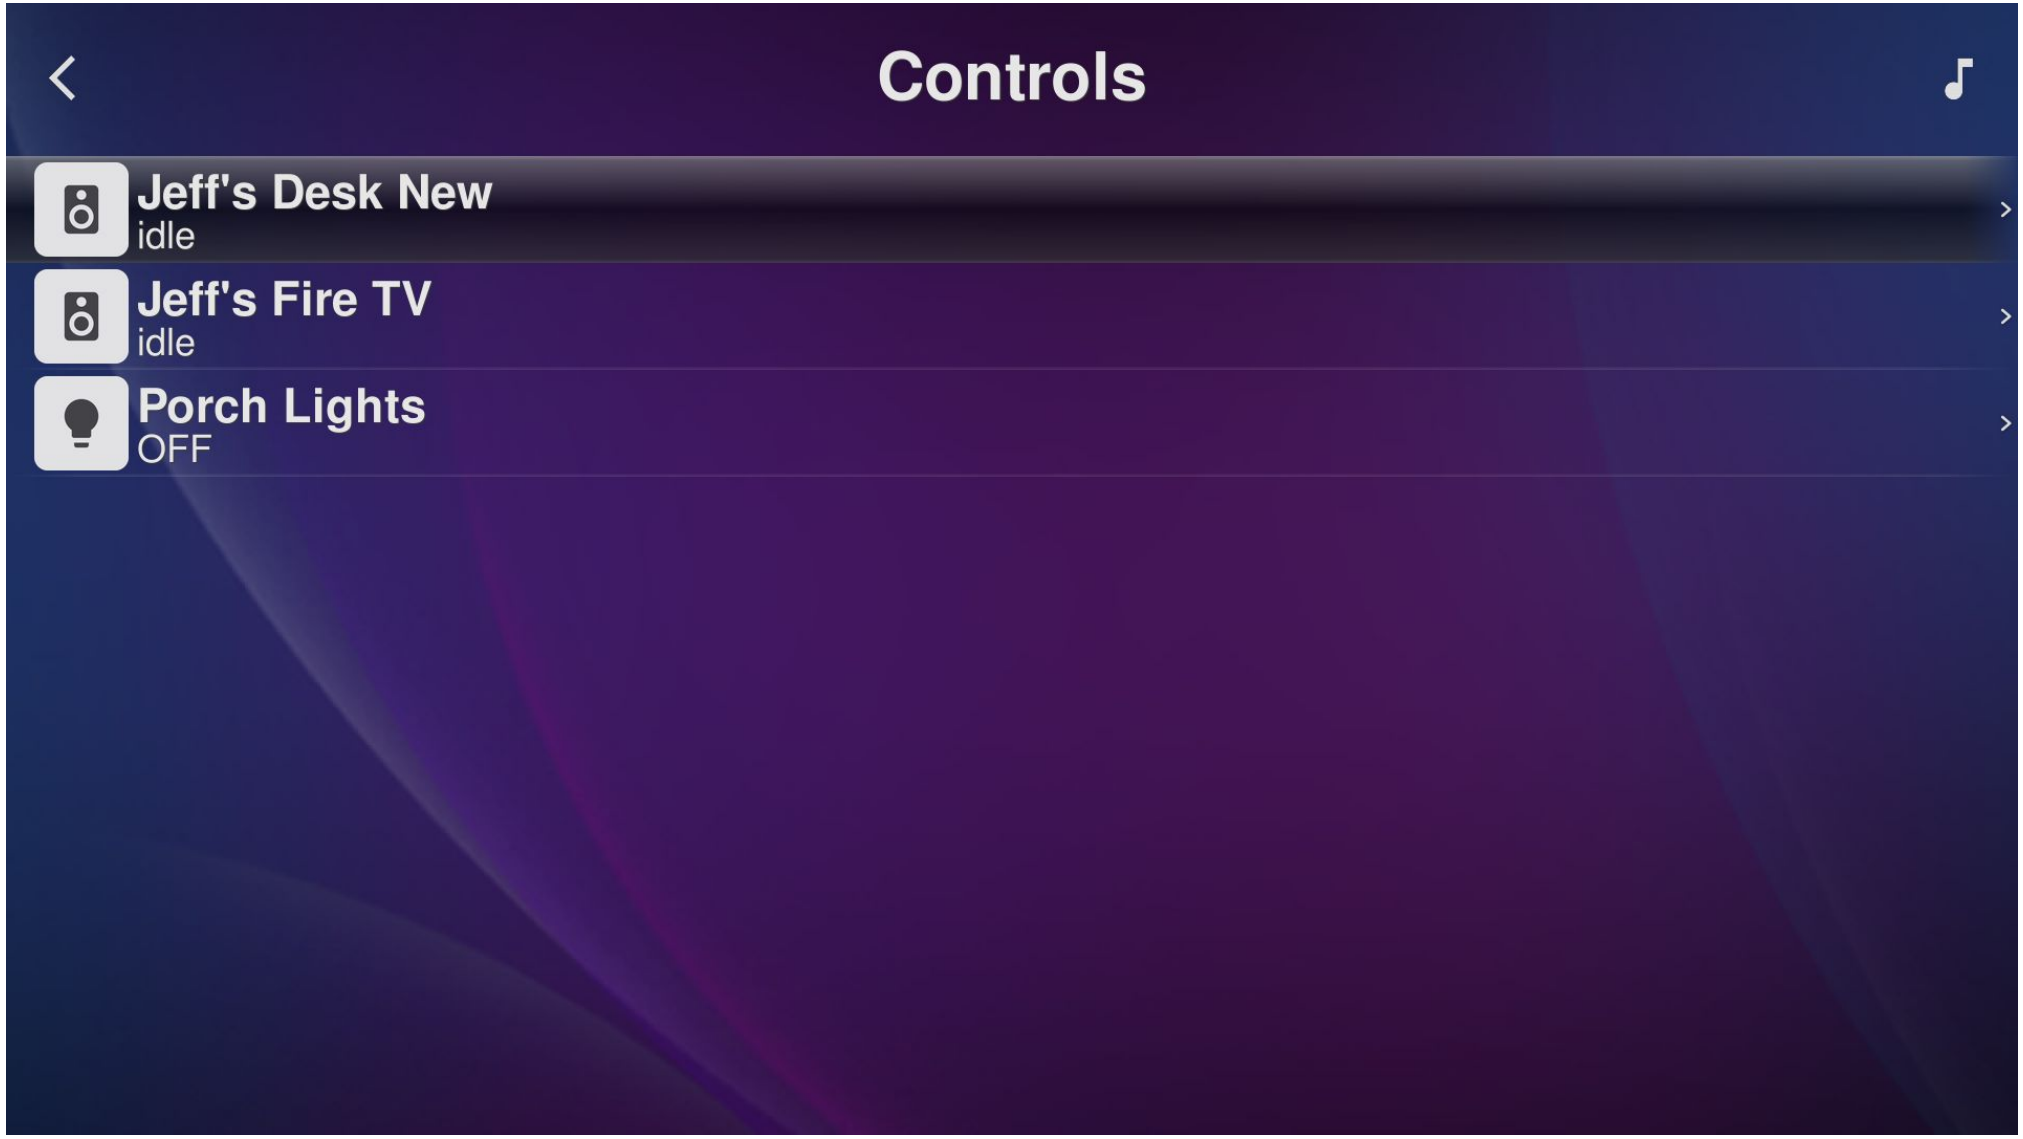

Entities whose state is the address of a picture of a dashboard. Shown full screen like the cameras.

Settings - HA Extras - Dashboards - Squeezebox

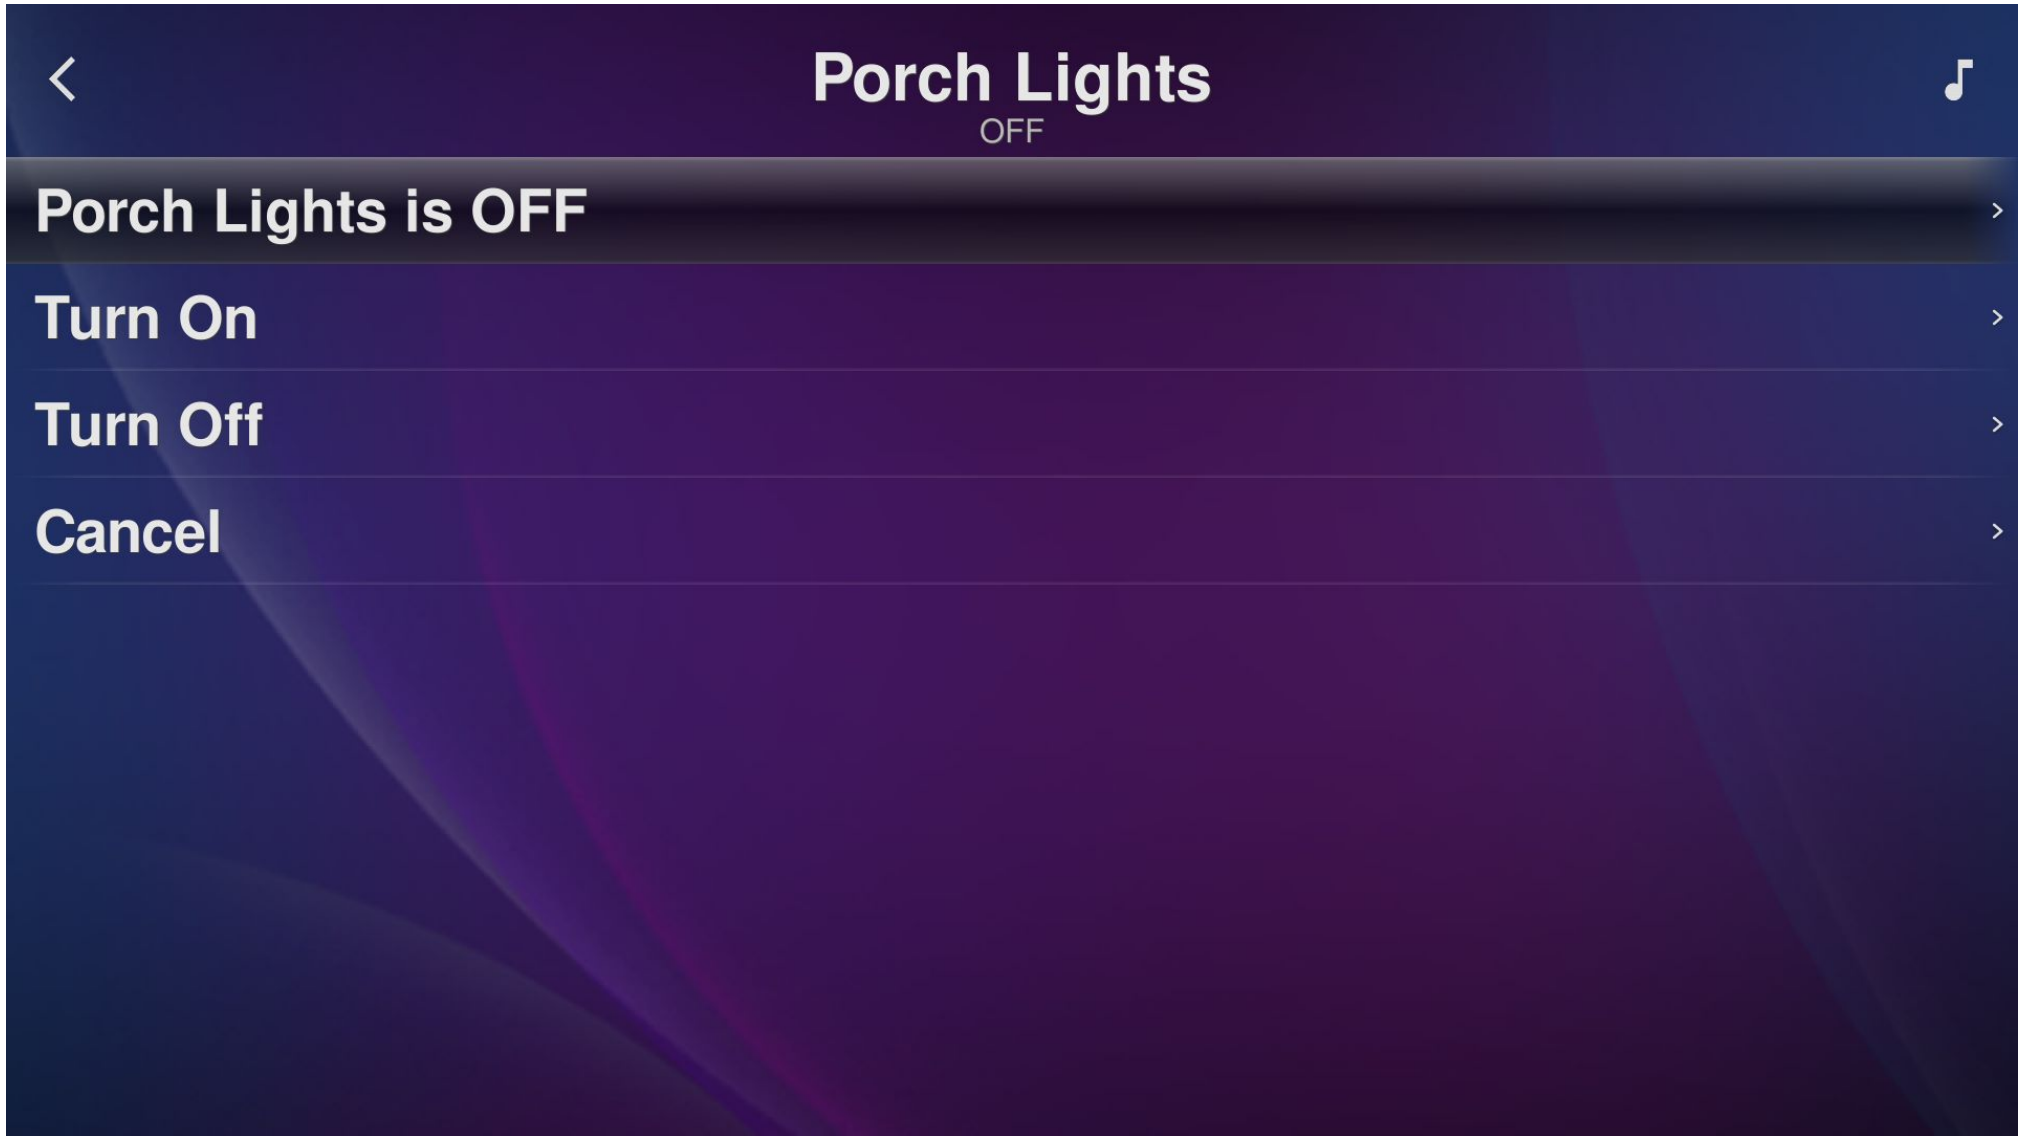

A dashboard in the Image Viewer. A screenshot service renders the picture; it is fetched again about every 10 seconds.

Settings - HA Extras - Controls

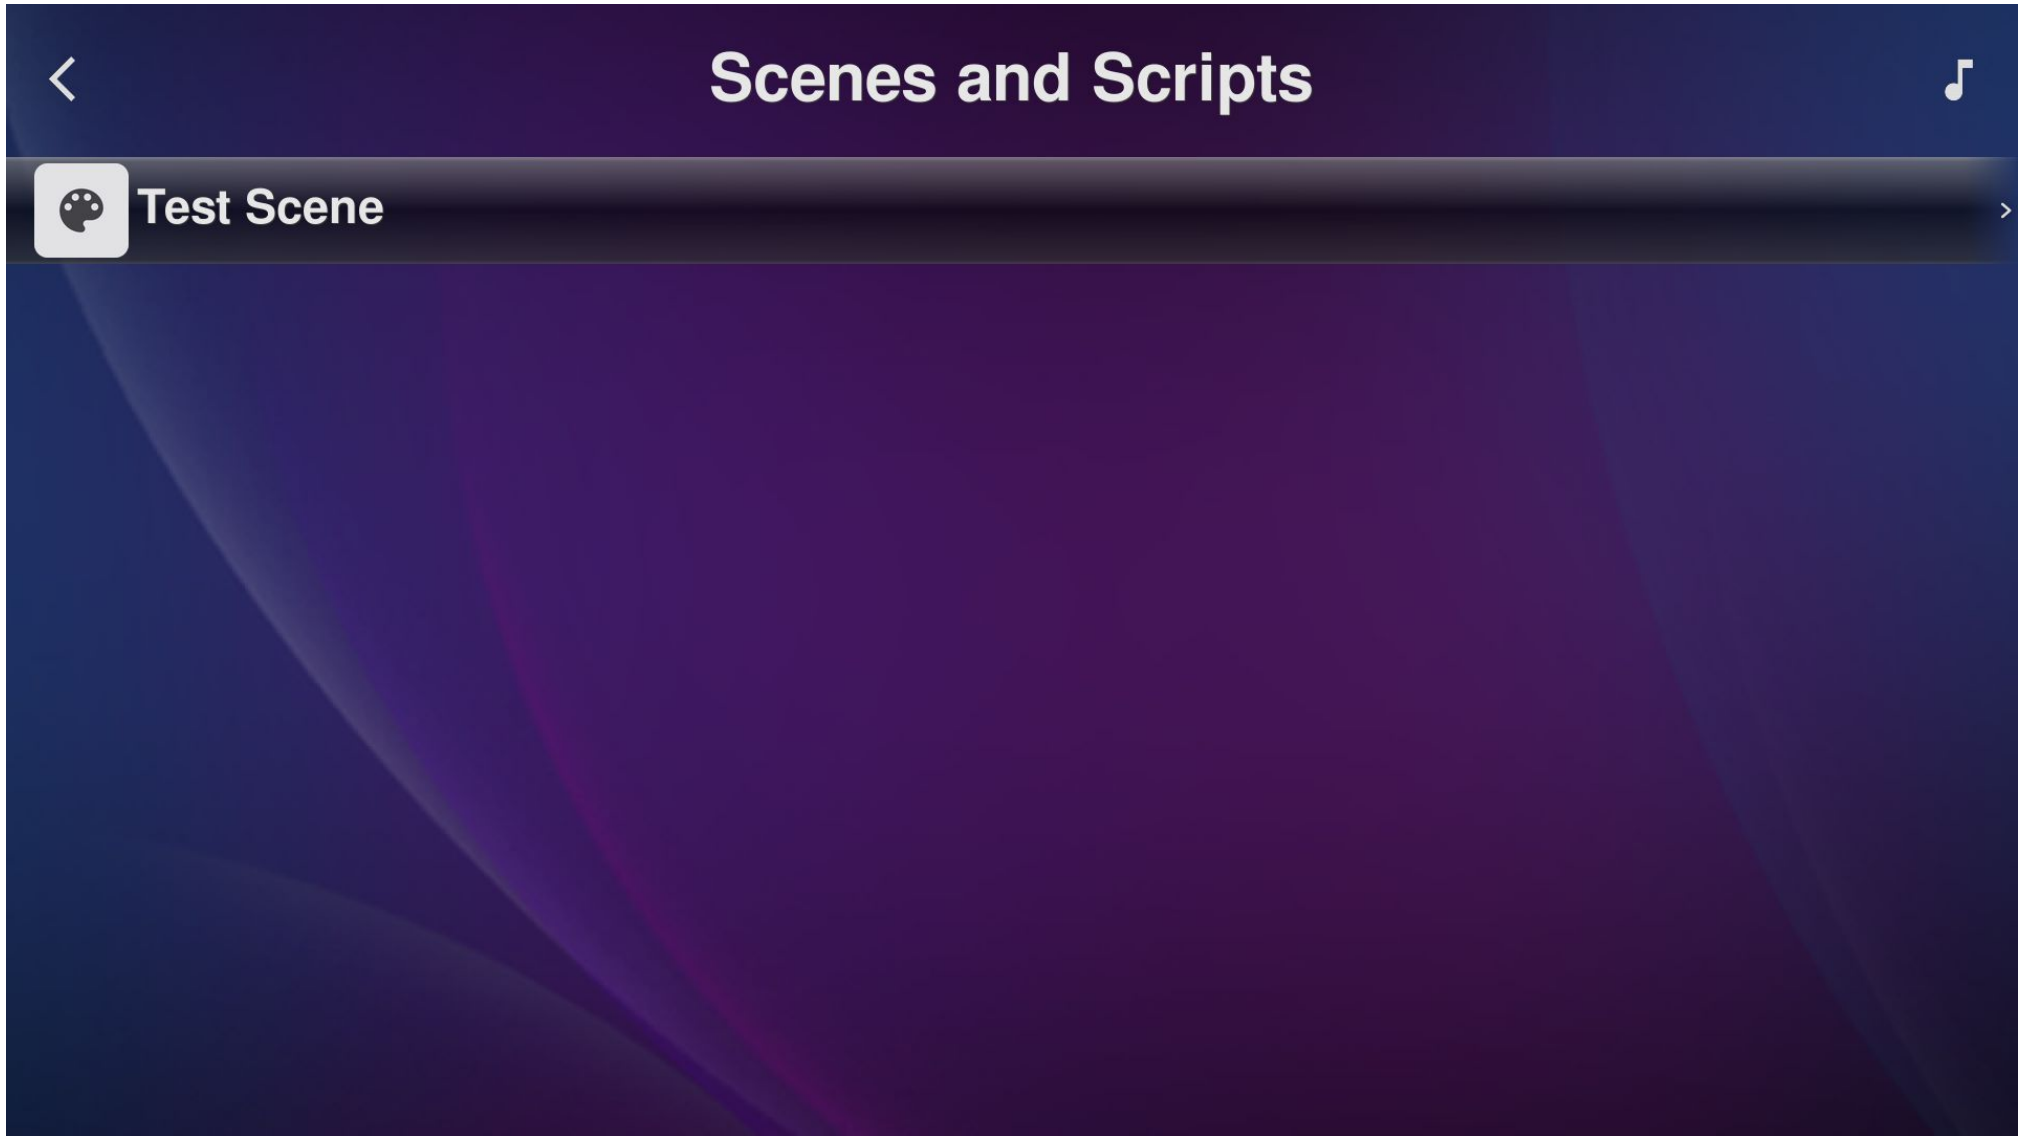

Choosing a row opens Turn On / Turn Off / Cancel.

Settings - HA Extras - Controls - Porch Lights

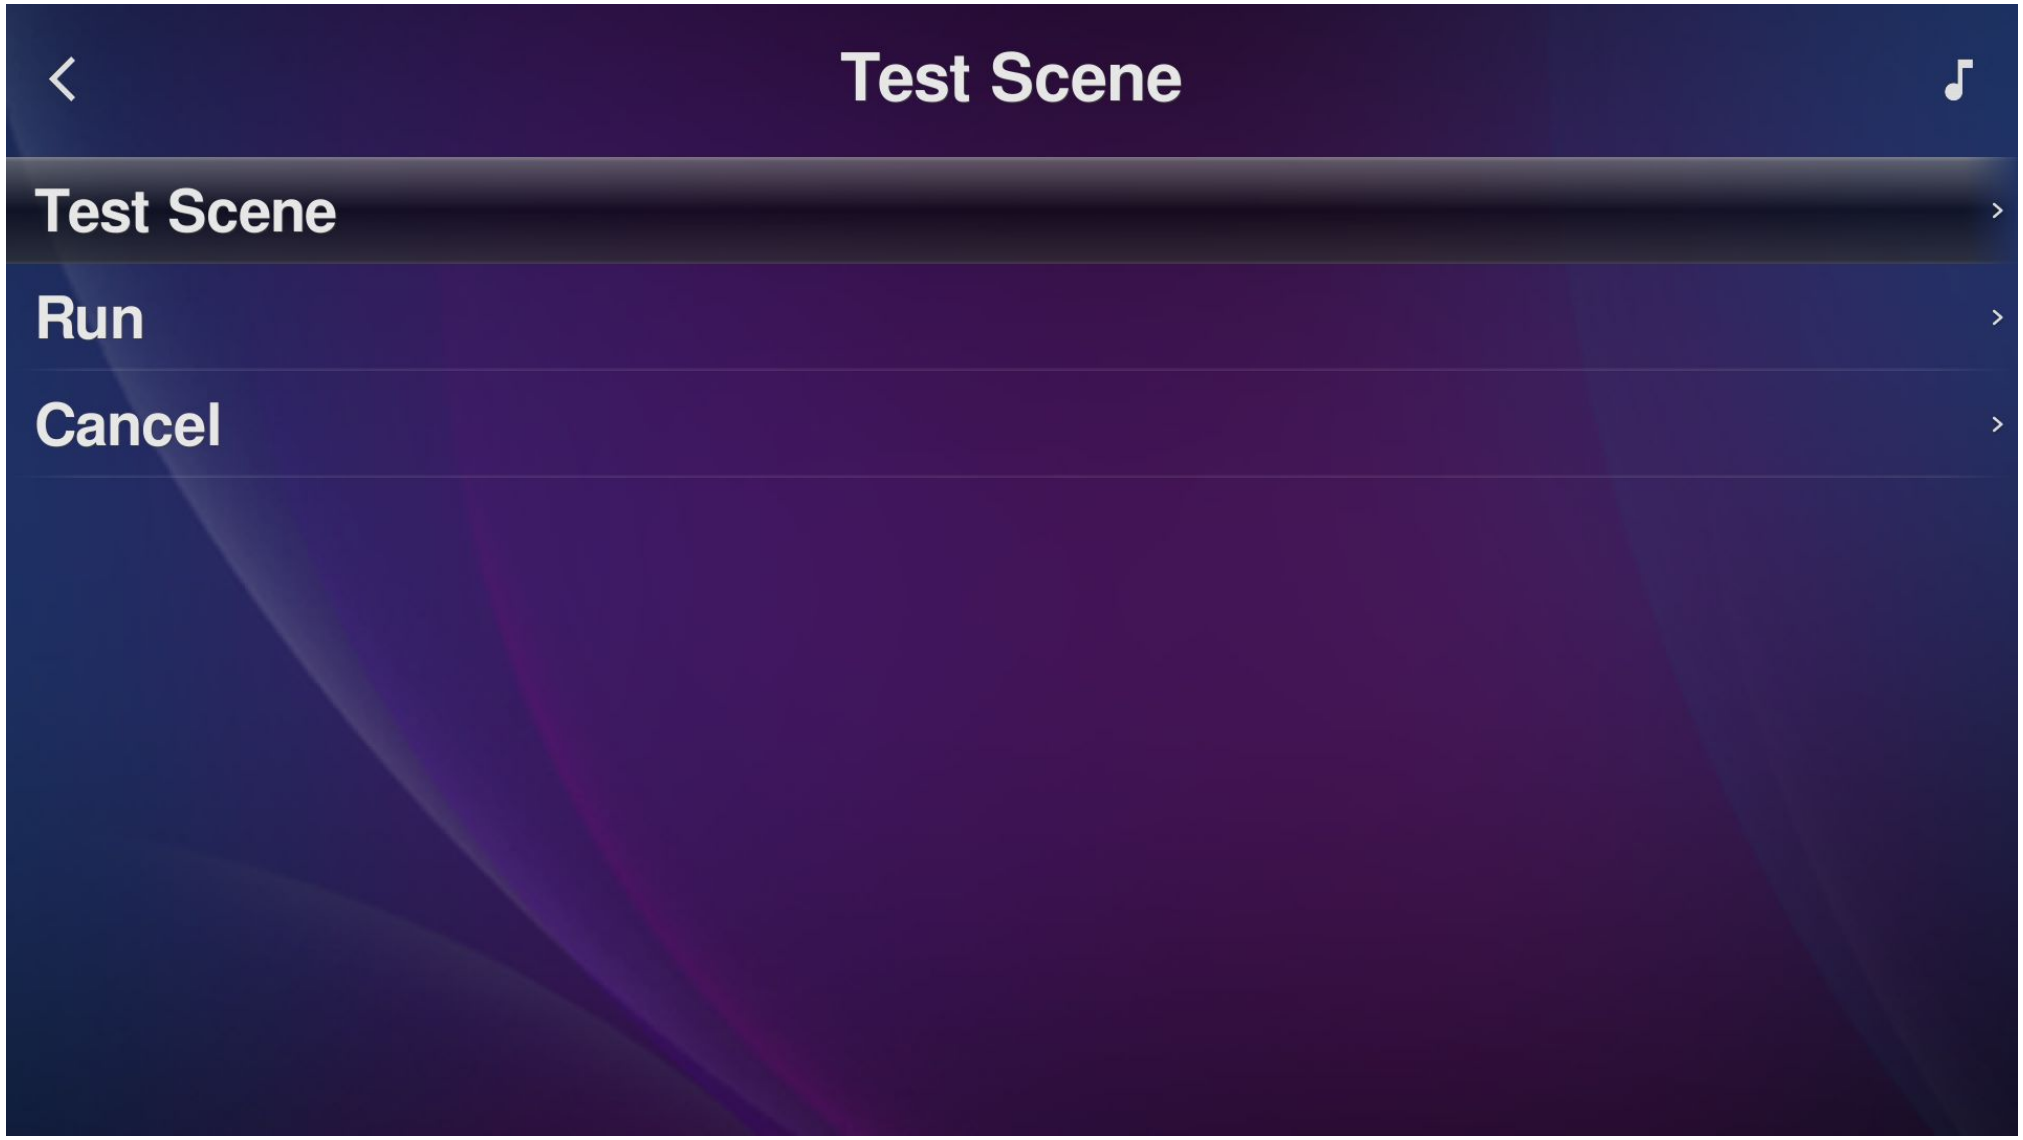

Choosing a control opens its menu: the current state, Turn On, Turn Off and Cancel.

Settings - HA Extras - Scenes and Scripts

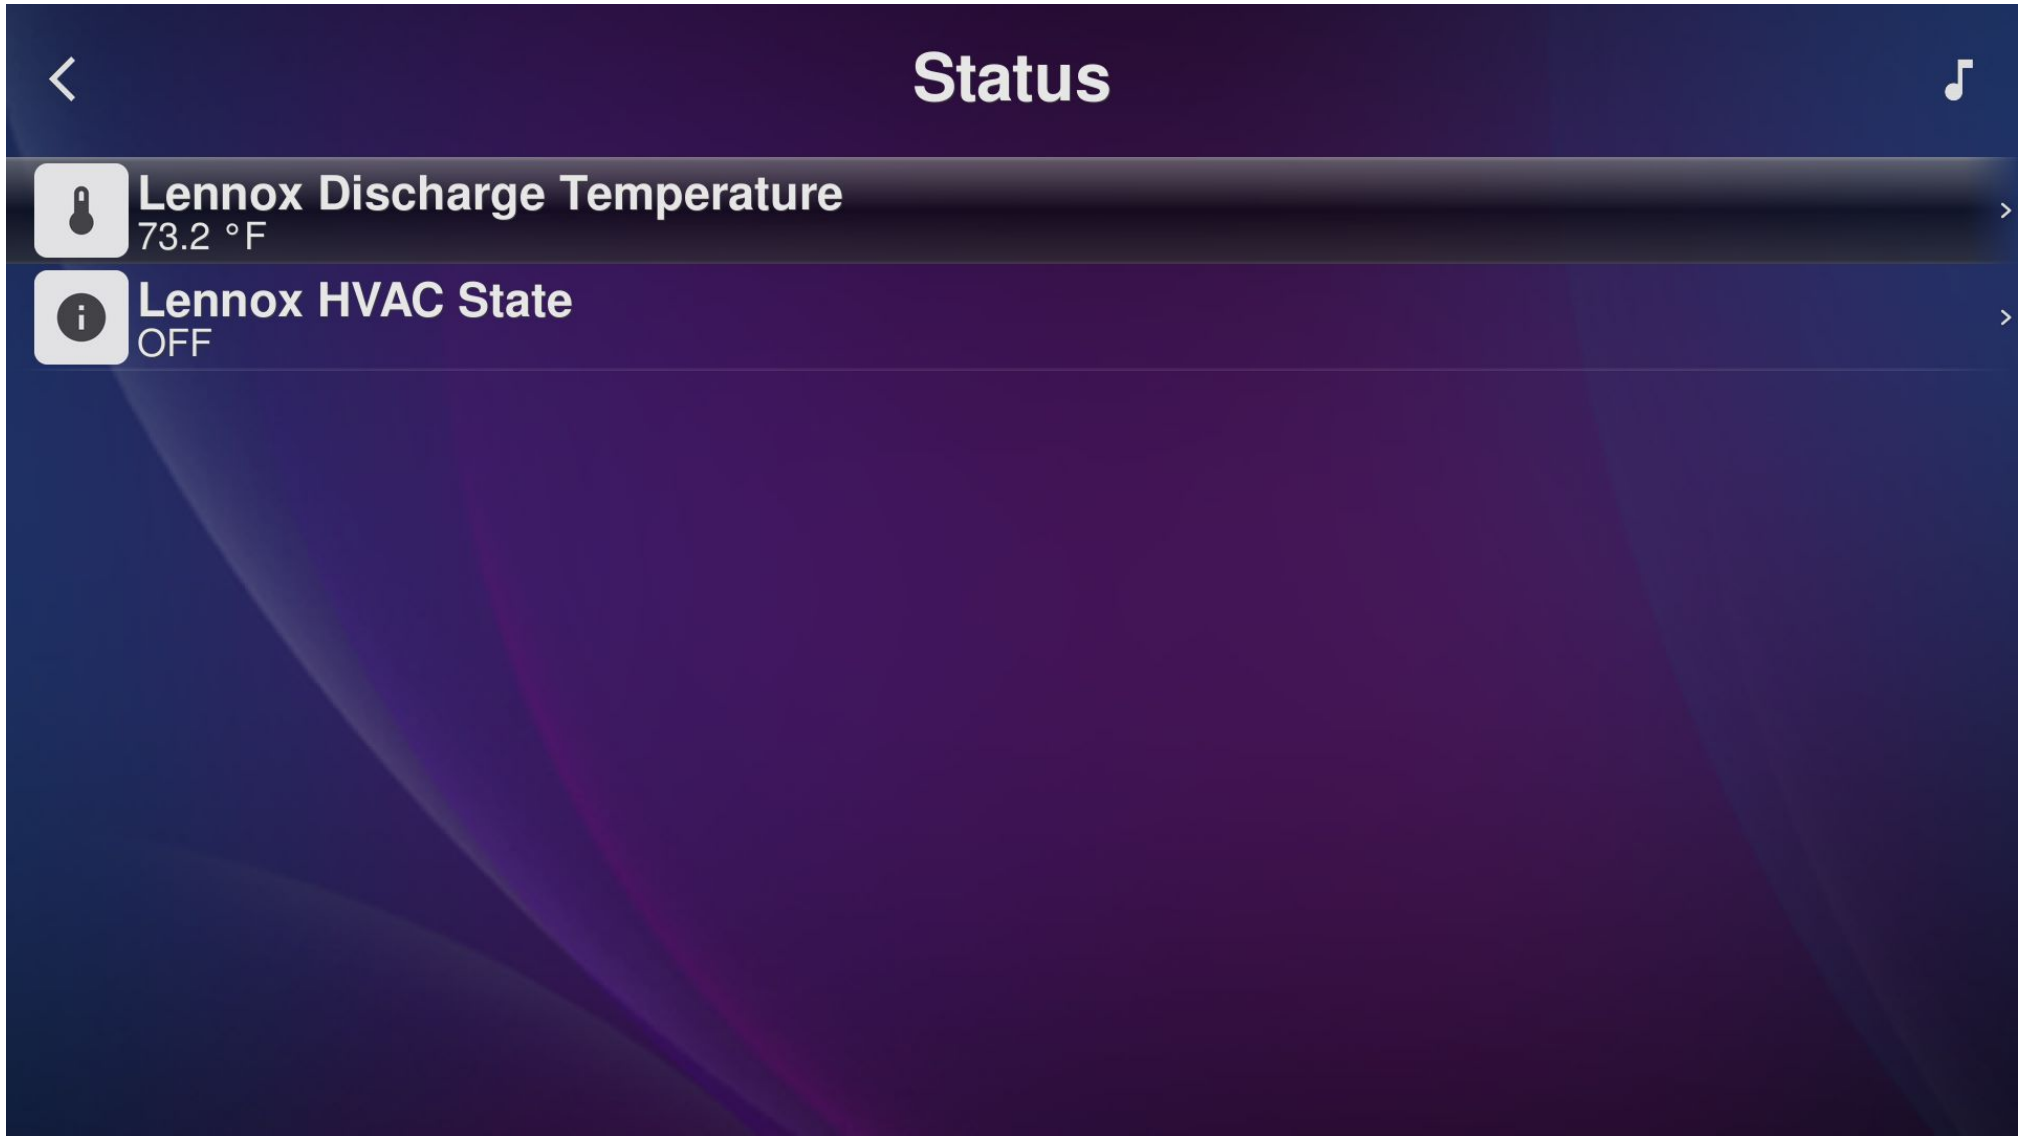

Choosing one opens Run / Cancel.

Settings - HA Extras - Scenes and Scripts - Test Scene

Choosing a scene opens Run and Cancel.

Settings - HA Extras - Status

Read-only values.

MA-SqueezeliteBrowse: menu walkthrough

Squeezebox Radio (UE2)

Screens of a Logitech Squeezebox Radio (SqueezePlay, 320x240) browsing Music Assistant 2.10.6 with the patched Squeezelite provider. The same steps as the piCorePlayer deck, captured on 2026-10-14 by a macro running inside the Radio's own software. The content shown is a moment in time: it follows the library, the presets and the Home Assistant labels.

Main Menu

Home screen. Settings holds the HA Extras entry when it is enabled for the device.

Now Playing

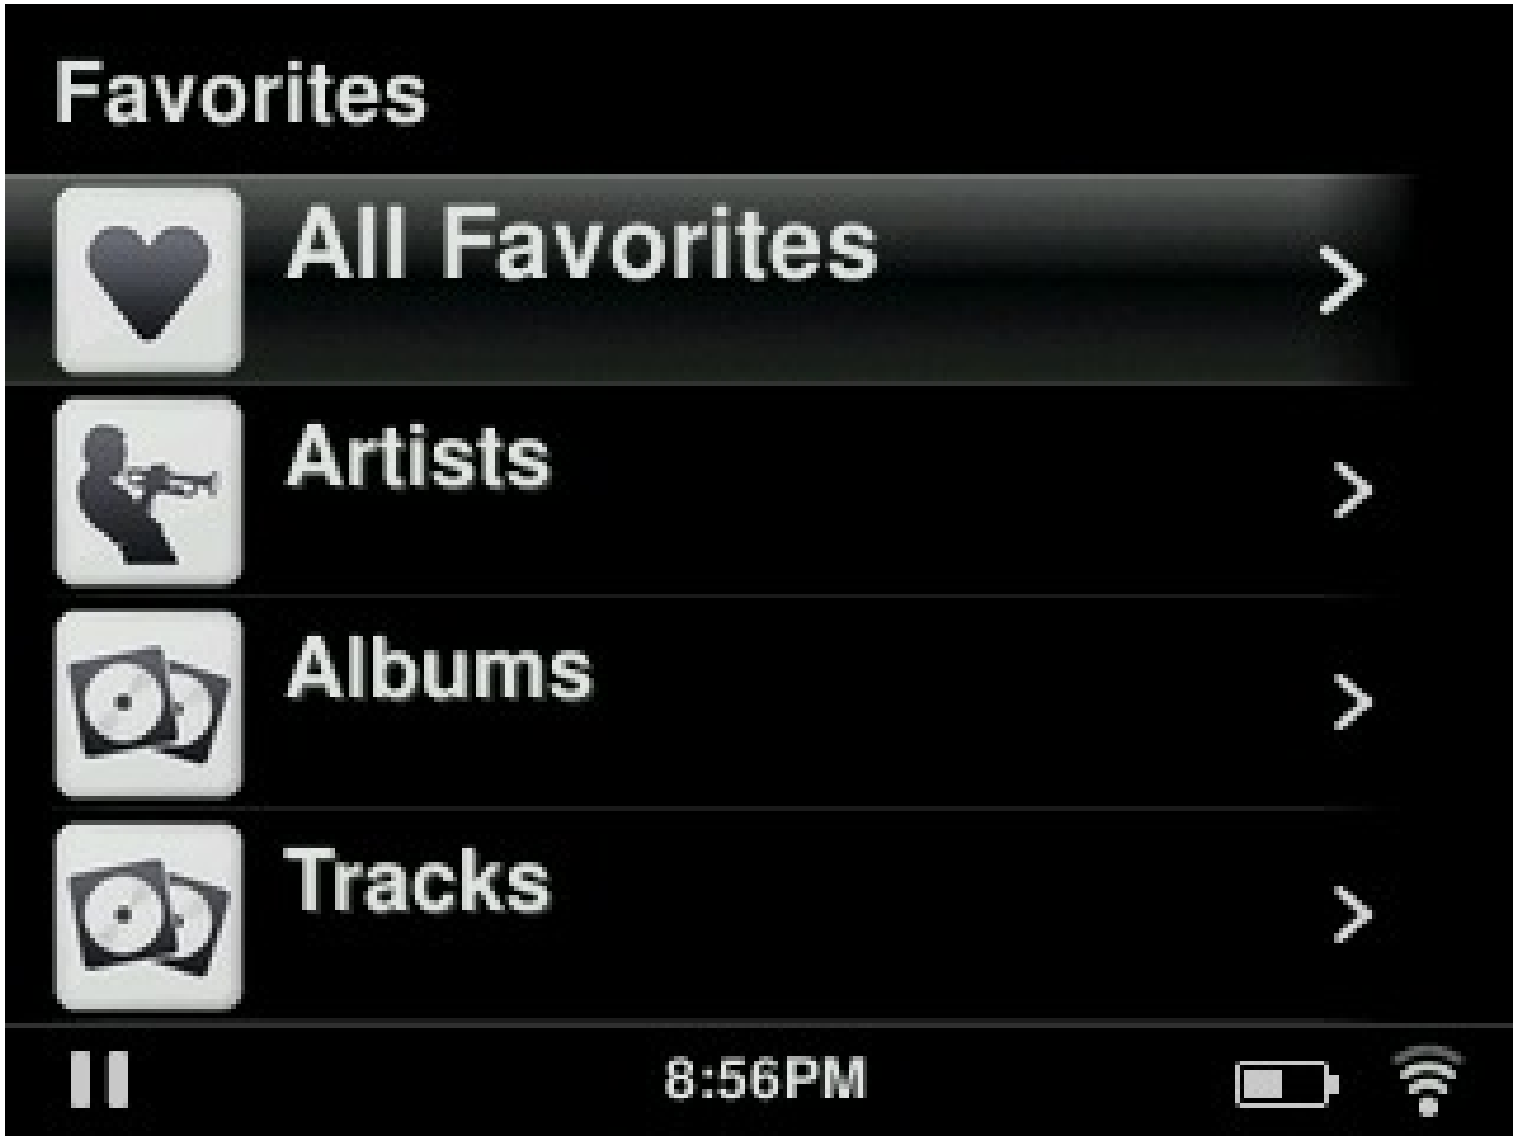

Shows the current track from the Music Assistant queue.

My Music

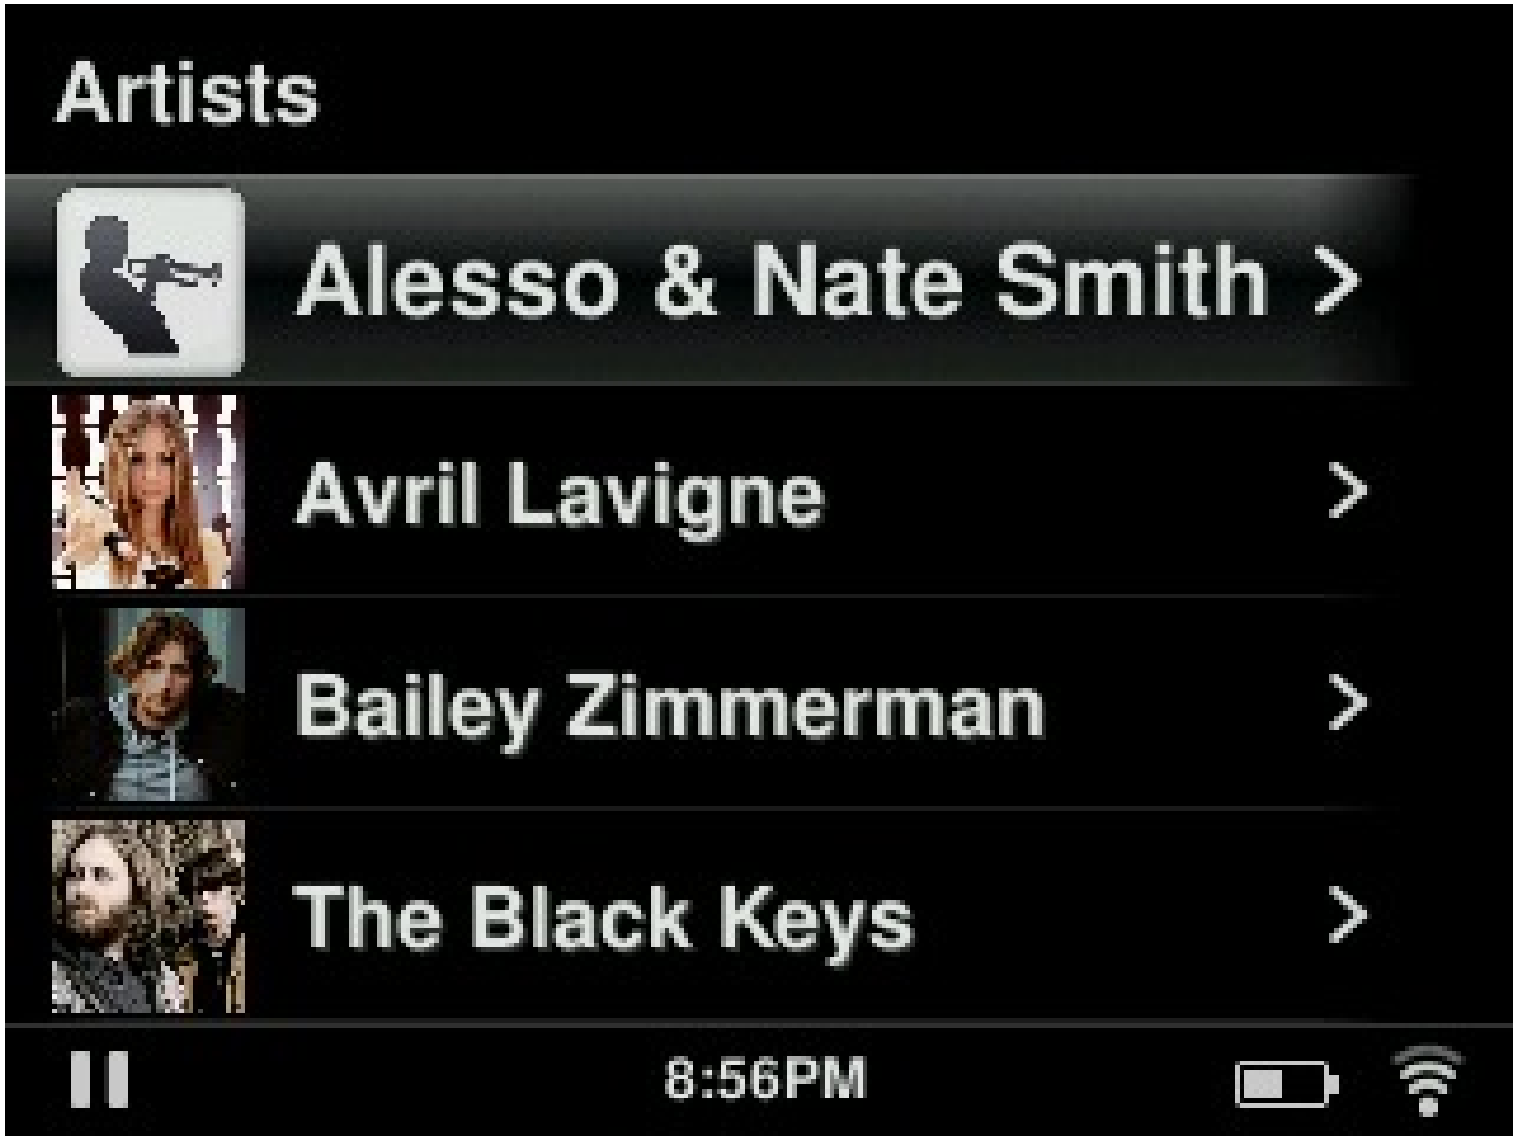

The preset entries come from the player's settings in Music Assistant (favorited playlists and radio stations).

My Music - Favorites

All Favorites, then one entry per type.
